LAND RECLAMATION DIVISION
MEMORANDUM NO. 93-11

TO: Recipients of IDMM's Permanent Program Regulations

FROM: Scott Schmitz, Supervisor SS
Land Reclamation Division

DATE: December 17, 1993

RE: Regulatory Amendments

Enclosed are copies of amendments to various sections of the Illinois Department of Mines and Minerals' (IDMM) permanent program regulations (62 Ill. Adm. Code 1700-1850). The enclosures are being sent as replacement pages for insertion into the existing regulation booklets per the instructions outlined herein.

Except those discussed below, the enclosed amendments were approved by the Office of Surface Mining (OSM) on September 3, 1993 (See 58 Fed. Reg. 46845-46857, September 3, 1993). Although the amendments contain an effective date of July 1, 1993, they were not enforceable by the IDMM until OSM officially approved them on September 3, 1993. OSM is requiring the IDMM to further revise the following amendments:

1. 62 Ill. Adm. Code 1816.116/1817.116(a)(3)(E): OSM is requiring the IDMM to amend these sections to include ground cover success standards for pasture and grazing lands.

2. 62 Ill. Adm. Code 1845.12(d): OSM found this proposed regulation less effective than federal regulations. As such, Section 1845.12 will be enforced as if subsection (d) did not exist.

3. 62 Ill. Adm. Code 1847.3(l)(1) and (2): OSM is requiring the IDMM to amend these regulations to grant judicial review if the regulatory authority fails to act within applicable time limits.
