Re: Lake Michigan Dredging Permit in Evanston

Attached you will find a copy of the Joint Application Form and maps, which the City of Evanston submitted for permission to dredge at the Church Street Boat Ramp in Evanston.

The request will permit continuation of the dredging operation previously authorized by the ten-year permit in 2005. Our proposal involves continuing the process of dredging up to 10,000 cubic yards of sand annually from the Church Street Boat Ramp, when necessary. Generally, dredging operation work occurs within the month of April so the ramp can open in early May.

Dredging work performed at the Church Street Boat Launch is in compliance with Illinois' coastal management program and would be in line with policies of the program. Additionally, the City of Evanston is totally dedicated to help ensure the long-term environmental and economic health of the shoreline and the waters of Lake Michigan.

If you have any questions about this request or need further information, please contact me at 847-448-8063 or bdorneker@cityofevanston.org

Sincerely,

Bob Dorneker
Assistant Director, Parks and Recreation

8. PROJECT DESCRIPTION (Include all features):
 Throughout the year sand accumulates inside the Church Street Boat harbor. As a result, each spring sand needs to be removed from harbor. Depending on the year, up to 10,000 cubic yards of sand annually would be removed from the Church Street Boat harbor. Sand dredged from this area is then relocated to an area immediately just south of the boat ramp in the water. Dredging is either done by mechanical equipment or vacuum excavation of the sand, depending on the amount needed to be removed. Approximate size of area, where sand needs to be removed is 29,433 square feet.

9. PURPOSE AND NEED OF PROJECT:
 This annual operation is necessary to maintain access to the boat harbor. Not removing sand from the harbor would require closure of the launch ramp facility. The request is a continuation of the previously approved ten year permit. There has been no change in conditions at the site.

COMPLETE THE FOLLOWING FOUR BLOCKS IF DREDGED AND/OR FILL MATERIAL IS TO BE DISCHARGED

10. REASON(S) FOR DISCHARGE:
 Dredged sand is placed south of the ramp for purposes of beach nourishment for this area.

11. TYPE(S) OF MATERIAL BEING DISCHARGED AND THE AMOUNT OF EACH TYPE IN CUBIC YARDS FOR WATERWAYS:
 TYPE: Sand
 AMOUNT IN CUBIC YARDS:
 800 - 7000 cubic yards

12. SURFACE AREA IN ACRES OF WETLANDS OR OTHER WATERS FILLED (See Instructions)
 Dredged sand is discharge back into the open water by mechanical loader or by dredge pump

13. DESCRIPTION OF AVOIDANCE, MINIMIZATION AND COMPENSATION (See instructions)
 Depth readings are charted in the harbor, prior to any work and dredging is performed only in areas, that do not meet a minimum depth of 6 to 7 feet.

14. Date activity is proposed to commence: April 2015
 Date activity is expected to be completed: May 15th 2015

15. Is any portion of the activity for which authorization is sought now complete? Yes No
 Month and Year the activity was completed: _____
 NOTE: If answer is "YES" give reasons in the Project Description and Remarks section. Indicate the existing work on drawings.

16. List all approvals or certification and denials received from other Federal, interstate, state, or local agencies for structures, construction, discharges or other activities described in this application.
