

Service Learning 2015

The Illinois State University Golf Course worked in cooperation with the grounds department to move large trees from the ISU nursery. We planted trees 8 years ago with plans to move to areas in need of large trees to replace Ash trees lost. This project was a cost efficient means to re-forest the golf course that is used for golf classes, tournaments, and the community to enjoy the course.

Native oaks, spruce and white pine for the Weibring Golf Course at ISU
