

Completion of the Illinois Natural Areas Inventory Baseline Database  
Wildlife Preservation Fund Project #04-L17W

This project was continued from FY03 to enter the original Illinois Natural Areas Inventory data into a database format that is compatible with other DNR databases. The contractor, Michael Jones, added 36,248 records to 9 databases during FY04, completing the entry of all original INAI data. A total of 76,975 records were entered over the two fiscal years of the project.

The final project report in the form of a compact disc containing all databases is in the files of the Natural Heritage Database Program.
