MEMORANDUM

to: Bob Bluett, Wildlife Diversity Program Manager
G.E.P.

from: Gary E. Potts, District Wildlife Biologist

date: October 11, 2005

subject: Vernal Ponds - bill and maps

reference: Crawford Co. Cons. Area

Enclosed is the bill from Wells Bulldozing for the construction of 12 vernal ponds (minimum of 10 were required) on the Crawford County Conservation Area per the approved plan. District Restoration Ecologist Terry Esker and I looked at the completed vernal ponds and they look acceptable. Site Superintendent Jim Gillespie and I met with the equipment operator prior to the construction to show him the pond locations and answer any questions. Once the ponds were completed by the contractor, Terry Esker had IDNR staff seed the berms and place trees and/or tree limbs into the ponds for structure and habitat. Also enclosed is a map indicating locations of the vernal ponds. As per your e-mail, you mentioned that you will handle the payment voucher. This project is a good example of team effort! Thanks for your part.
