FINAL REPORT: **Grant Agreement #14-R03W**

Submitted by: **Jane Seitz, Executive Director**
November 19, 2013

Project Objective as Described in Application:

The Illinois Raptor Center (IRC) is a 25 acre 501(C)(3) private nonprofit wildlife rehabilitation and conservation education organization located on the Sangamon River in Decatur, IL. When that property was purchased in 1994, the IRC had little money to renovate the empty workshop that was to become its wildlife hospital. Fixtures that were installed were cheap. That's especially true with the cabinets, counter top, and three sinks and faucets in the exam room. Through years of wear and hard well water, they are showing damage. The only sink we could afford at the time for a "therapy" sink is inadequate. Replacing fixtures before they become dilapidated and cause serious water damage is cost saving. Sinks are vital to food preparation and cleanliness. Replacing the old therapy sink with a larger, deeper one would help bathe wildlife that comes in covered, for example, in mud or tar or when water therapy is needed for their injuries.

Completed Project Description:

In June of this year the Illinois Raptor Center received a very generous donation as the beneficiary of a trust. With that money we decided not to just replace the wildlife hospital's sinks, faucets and cabinets as we had stated in our Wildlife Preservation Grant request but to renovate the entire hospital.

The work was contracted to Michael Phillips Construction. The contract total for the renovations was $19,416.67. Of that amount $9,276.67 was for materials of which $3214.85 was for sinks, faucets and cabinets that I had picked out from Lowe's. Payment for the materials was made up front before construction began. Many things had to be ordered. Payment for construction labor has been made in increments at the contractor's request. The contractor has been working on multiple projects at the IRC since June. The hospital renovations have now been completed and the contract fulfilled.

Summary of the Project Accomplishments:

We have been told that the wildlife hospital looks like the emergency room in a human hospital. Everything is shiny white and clean. There is more cabinet space. Everything can be put away and nothing is left sitting out. There is counter space for microscopes and computers. The walls are freshly painted and we have a new entry that keeps our wildlife patients completely out of view from the public. The new therapy sink is large enough to clean carriers and cages and deep enough for a duck to swim. The hospital is efficient, well organized and beautiful.

Receipts, grant announcement and payment request certificate are attached.

Illinois Raptor Center Awarded Wildlife Preservation Grants

The Wildlife Fund Advisory Committee recently awarded Wildlife Preservation Grants for the year. Wildlife Preservation Grants are made possible by individuals voluntarily donating $1.00 to the check-off designation on their Illinois income tax returns. All donations to Wildlife Preservation are used to assist non-game wildlife and native plants in Illinois with a portion used for grants to wildlife rehabilitation centers for the maintenance and repair of facilities used to care for threatened and endangered Illinois wildlife.

The Illinois Raptor Center has been awarded three grants from these funds. Two grants will be used to replace sinks, faucets, cabinets and an air conditioner unit in the wildlife hospital. The third grant will be used to repair a barn used for rehabilitation. The three grants total $4,950.00.

The Illinois Raptor Center has cared for threatened and endangered species at its Decatur facility since 1994. A list of Illinois species that are threatened or endangered can be found at http://www.dnr.illinois.gov/ESPB. The Illinois Raptor Center website is www.illinoisraptorcenter.org where donations to help orphaned and injured wildlife are accepted through Paypal.
