Message From the Director

As director of the Illinois Department of Natural Resources, it is my pleasure to welcome you to the 2018-19 hunting and trapping season in Illinois — and to thank you for taking time to review this updated edition of the Illinois Digest of Hunting and Trapping Regulations.

This digest includes a detailed review of Illinois hunting and trapping season dates, possession limits, hunting zone boundaries, statewide hunting regulations, license and permit information, sunrise and sunset tables, and other details you should find helpful.

New or amended regulations for 2018-19 are in shaded print to highlight them. Please take time to review the digest and become familiar with all the regulations regarding your hunting and trapping interests before heading to the field.

The digest also contains information on Illinois public hunting areas, frequently asked questions, and on efforts to maintain healthy wildlife populations.

Our hunting heritage in Illinois is well known around the state and throughout the country. The Illinois Department of Natural Resources is committed to protecting our wildlife resources, and to expanding hunting opportunities. We recognize the important role hunters and trappers play in managing wildlife — and we thank you for taking part in these activities and buying the licenses and permits that support our programs.

We sincerely appreciate your interest in hunting and trapping in Illinois, and wish you the best for a great season.

Wayne A. Rosenthal, Director
Illinois Department of Natural Resources

Digest Update

IDNR’s Hunter Heritage Program endeavored to improve the clarity and ease of finding hunting and trapping information relevant to your specific interests in the digest this year. For example, if you want to hunt turkey, you should be able to find all the information you need to hunt turkey in one section. All websites listed in the digest can be clicked to go directly to those sites. Due to federally-approved waterfowl harvest limits now being available earlier, waterfowl regulations and information were also added into this digest to further simplify finding information without the need for a separate waterfowl digest. The IDNR appreciates your feedback and will continue to work diligently to make hunting and trapping regulations in Illinois easier to understand.

This publication is a summary of Illinois hunting and trapping regulations prepared for your convenience. It is designed as a guide to help you understand the laws and regulations for hunting and trapping in Illinois. It also provides information such as seasons, harvest limits, and required permits for these opportunities in Illinois. It is not a legal document and is not intended to cover all hunting and trapping laws and regulations. This document does not contain the exact wording of the Illinois’ Adopted Administrative Rules available at www.dnr.illinois.gov/adrules/pages/default.aspx or the Wildlife Code of the Illinois Compiled Statutes available at www.ilga.gov/legislation/ilcs/ilcs2.asp?ChapterID=43.

Role of Hunters as Stewards of Wildlife and Habitat

- The Federal Aid in Wildlife Restoration Act, also known as the Pittman-Robertson Act, was enacted by congress in 1937 in response to hunter and firearm industry concern of overexploitation and loss of wildlife and habitat.
- Federal Aid in Wildlife Restoration Act funds come from a 10–11% excise tax on firearms, ammunition, and archery equipment.
- Federal Aid in Wildlife Restoration Act funds are collected by the U.S. Department of the Interior that allocates funds to state wildlife management agencies for hunter education programs, shooting ranges, and improving game and non-game wildlife populations, including habitat management and research.
- The Federal Aid in Wildlife Restoration Act has been crucial in successfully managing many species, including white-tailed deer, turkeys, waterfowl, and numerous non-game wildlife in Illinois.
- Between July 1, 2017 and June 30th, 2018, the IDNR was allocated 15.4 million dollars, which was used for numerous benefits to outdoor enthusiasts.
- Increasing the number of people hunting and trapping is critical to sustaining Federal Aid in Wildlife Restoration Act monies needed to maintain healthy wildlife populations, habitat and our rich heritage of outdoor recreation in Illinois.
- By purchasing hunting licenses and equipment, you are a steward of wildlife and habitat in Illinois. The IDNR thanks you for your stewardship and hopes you continue to hunt, and introduce ‘first-timers’ to those activities.

ON THE COVER

A white-tailed deer on Clinton Lake State Recreation Area in DeWitt County. Photo courtesy of Ryan Maxwell of DeWitt, Illinois.
Mat Lenell harvested his first wild turkey on IRAP land this past spring, after participating in the Illinois Learn to Hunt http://www.learntohuntill.com/program.
The map and table provide Central Standard Time sunrise and sunset times by region from August through May.

Match month and date with the zone you hunt in and add the appropriate number of minutes for the sunrise/sunset time. These times have been adjusted to reflect the correct time on all dates, including Standard Time and Daylight Saving Time. This table is also available at www.dnr.illinois.gov/hunting.
• Additional licenses, permits and stamps required to hunt or trap particular species are listed in sections covering those species in this digest.
• All hunting licenses and state stamps are effective from date of purchase 2018 through 31 March 2019.
• Every person holding a hunting license shall have it, including all appropriate stamps, in his/her possession for immediate presentation for inspection to any authorized law enforcement officer while hunting.

Armed Forces

| See specifications |

All persons on active duty in the U.S. Armed Forces are considered Illinois residents. A person on active duty in the Armed Forces, who entered the service from Illinois and is an Illinois resident, may, while on ordinary or emergency leave, hunt without a license. Illinois resident military, guard or reserve members who have recently served abroad maybe eligible for the Illinois Resident Armed Forces Special Pass, that waives fees for fishing, hunting and camping. Eligible persons MUST APPEAR IN PERSON at IDNR’s Springfield office. See details at www.dnr.illinois.gov or call (217) 782-2965. Former POW are required to purchase a resident or non-resident hunting license.

**Lost, Stolen or Destroyed License Replacement**

1. Licenses purchased via the Internet can be reprinted at no charge by visiting www.dnr.illinois.gov/LPR. Vendor transactions will incur a fee.
2. Replacement licenses, permits and stamps are available for $3 from IDNR’s Springfield office.
3. Vendors can issue replacement licenses with a IDNR Direct terminal. There is a $3 replacement fee per item plus a small transaction fee.

**Firearm Owner’s I.D. Card**

Regardless of who owns the firearm, Illinois residents who have a firearm or firearm ammunition in their possession also must have in their possession a valid Firearm Owner’s I.D. (F.O.I.D.) Card, issued by Illinois State Police, unless they are:
- a licensed out-of-state sportman hunting in Illinois,
- a resident who is hunting within a licensed commercial club (licensed by IDNR), provided he/she is accompanied by a person who has a valid card,
- under the age of 21 and under the immediate control of a parent, guardian or responsible adult who has in his or her possession a valid F.O.I.D. card.

IDNR does not issue F.O.I.D cards. To obtain a F.O.I.D. card visit this site https://www.ispfsb.com/Public/FOID.aspx or call the Illinois State Police at (217) 782-7980.

**Definitions**

**Case:** Any case, firearm carrying box, shipping box, or container acceptable under Article 24. https://law.justia.com/codes/illinois/2005/chapters/50752.html

**Daily Limit:** The maximum number or amount of species that can be lawfully harvested by one person in one calendar day.

**Floating Blind:** Any watercraft or floating structure that is capable of carrying a person and which is camouflaged, disguised or altered in appearance to offer a place of concealment. Such floating blind may be mechanically powered as long as such power is used only for movement to and from the place of hunting and no attempt is made to hunt during such movement.

**Freshly Killed:** Any carcase, remains or parts of the body of any dead mammal or bird that has not been prepared for immediate consumption or storage for later consumption.

**Furbearing Mammals:** Mink, muskrat, raccoon, striped skunk, weasel, opossum, beaver, red fox, gray fox, badger, bobcat, river otter and coyote.

**Game Birds:** Bobwhite quail, Hungarian partridge, chukar partridge, ring-necked pheasant and wild turkey.

**Game Mammals:** Cottontail and swamp rabbits, white-tailed deer, fox and gray squirrel and woodchuck (groundhog).

**Green Hide:** Any hide or pelt which has not been tanned.

**Gun:** Shotgun, muzzleloading rifle, handgun or airgun.

**Harvest:** Lawfully killing and possession of an animal. (differentiate with “Take”).

**Hunting:** the lawful pursuit, trapping, shooting, capture, collection, or killing of wildlife.

**Hunting License:** an electronic or physical license authorizing the person to harvest a certain type of animal during a specified period of time.

**IDNR:** Illinois Department of Natural Resources.

**Lead Ammunition:** A projectile containing one or more percent lead by weight.

**Migratory Game Birds:** Mourning dove, Eurasian collared dove, white-winged dove, ringed-turtle dove, sora rail, Virginia rail, American woodcock, common snipe, American coot, ducks, geese, swans and American crow.

**Possession Limit:** Maximum number or amount of species that can be lawfully held or possessed by one person at any time.

**Protected Species:** Wild birds and wild mammals, including parts, which shall include their nests, eggs and green hides, in the State of Illinois, or which may be brought into the State. See 520 ILCS 5/2.2 of the Wildlife Code for details.

**Resident:** “Resident” means a person who in good faith makes application for any license or permit and verifies by statement that he or she has maintained his or her permanent abode in this state for the purposes of obtaining any of the same or similar licenses or permits covered by this Code. A person’s permanent abode is his or her fixed and permanent dwelling place, as distinguished from a temporary or transient place of residence. Domiciliary intent is required to establish that the person is maintaining his or her permanent abode in this state. Evidence of domiciliary intent includes, but is not limited to, the location where the person votes, pays personal income tax or obtains a drivers license. Except for the purposes of obtaining a Lifetime License, any person on active duty in the Armed Forces shall be considered a resident of Illinois during his or her period of military duty.

**Sale:** To sell, barter or otherwise offer goods to another for consideration. The term sale includes serving the same as a part of a meal by any restaurant, hotel or other commercial establishment.

**Take:** To hunt, shoot, pursue, lure, kill, destroy, capture, gig or spear, trap or ensnare.

**Transport or Ship:** To convey by means of parcel post, express, freight baggage or shipment by common carrier of any description; or by automobile, motorcycle or other vehicle of any kind; or by water or aircraft of any kind or by any other means of transportation.

**Trap:** To capture, or attempt to capture, by setting or placing a leg-hold trap, body-gripping trap, cage or live-trap or other similar device permitted by the Illinois Wildlife Code to capture, hold or kill any protected wildlife.

**Vehicle:** Any device capable of transporting a person on land, on ice, on water, in water or in the air.

**Wildlife:** Any bird or mammal living in a state of nature without the care of man, including all protected wildlife.

**Shooting Safety and Skills Clinics**

The IDNR and partners offer “wingshooting” clinics that teach shooting safety, fundamentals and hunting skills using shotguns and moving clay targets. Clinics are held for novice to advanced shooters on weekends throughout Illinois during spring through early fall of each year. Visit the following website for more information, including a calendar of clinics: https://www.dnr.illinois.gov/recreation/wingshooting/Pages/default.aspx
North American Model of Conservation

The IDNR, along with many other state agencies, follows the North American Model of Conservation. This model was created due to a Supreme Court decision that declared that wildlife belongs to the people and not the government, corporations, or individuals. The model also guides how wildlife is to be used and managed for the benefit of wildlife and people. Without this model and many other efforts, we would not have an abundance of wildlife we have today.

There are seven principles to the model:

1. Wildlife resources are a public trust.
2. Markets for game are eliminated.
3. Allocation of wildlife is by law.
4. Wildlife can be killed only for a legitimate purpose.
5. Wildlife is considered an international resource.
6. Science is the proper tool to discharge wildlife policy.
7. Democracy of hunting is standard.

Statewide Regulations

Hunting Hours Restrictions  It is unlawful to hunt any wild game except during times specified for those game species in reference to official sunrise-sunset times for the location.

Possession and Daily Harvest Limits  It is unlawful to possess wild game birds, wild game mammals or wild fur-bearing mammals or any parts thereof in excess of the legally established daily limit or possession limit, whichever applies.

Maintaining Separate Bag  It is unlawful to possess wildlife for which there is a daily or possession limit unless each hunter maintains his/her “bag” of such species separately and distinctly from those of all other hunters.

Possessing Another’s Wildlife  It is unlawful to receive or have in custody any protected game belonging to another person, except in the personal abodes of the donor or donee, unless such protected species are tagged with the hunter’s name and address, the total number of individuals by species and the date such species were harvested. (But see “Gift of Migratory Game Birds” in Waterfowl Hunting section.)

Retrieving Killed/Crippled Wildlife (Wanton Waste of Game)  It is unlawful to kill or cripple any species protected by the Illinois Wildlife Code for which there is a harvest limit without making a reasonable effort to retrieve such species and include it in the harvest limit. It is also unlawful for any person having control over harvested game mammals, game birds, or migratory game birds for which there is a harvest limit to wantonly waste or destroy the usable meat of the game, except this shall not apply to wildlife harvested by means of a nuisance wildlife removal permit or wildlife harvested by means of a scientific collection permit. “Usable meat” means the breast meat of a game bird or migratory game bird and the hind ham and front shoulders of a game mammal. It shall be unlawful for any person to place, leave, dump, or abandon a wildlife carcass or parts of it along or upon a public right-of-way or highway or on public or private property, including a waterway or stream, without the permission of the owner or tenant. It shall not be unlawful to properly discard game meat that is determined to be unfit for human consumption.

Possession of Illegally Harvested Wildlife  It is unlawful to possess any species of wildlife or wildlife parts harvested unlawfully in Illinois or any other state or country, whether or not the wildlife or wildlife parts is indigenous to Illinois. The statute of limitations for unlawful possession of such wildlife or wildlife parts shall not cease until 2 years after the possession has permanently ended.

Possession of Freshly Killed Game Out of Season  It is unlawful to possess any freshly killed game when the season is closed for taking (see Wildlife Conflicts section for Deer Accidentally Killed).

Selling Wildlife, Feathers etc.  It is unlawful to buy, sell, or offer to sell or barter game birds or migratory game birds, or parts thereof, including feathers, nests or eggs (including wild turkey parts) or the edible parts of game mammals except as provided by specific permits.
Hunting Devices and Ammunition Restrictions

It is unlawful to:

• hunt any protected species except with a gun or bow and arrow.
• use any shotgun larger than 10 gauge while taking or attempting to harvest any protected species. Barrel length shall not be less than 18 inches, and the overall length shall not be less than 26 inches.
• hunt with, or have in your possession while hunting, a shotgun shell with shot larger than lead shot size BB, steel shot size T or number BBB of any other non-toxic shot. Except: Shot size is unrestricted for furbearer hunting and deer may be harvested with a shotgun no larger than 10 gauge or smaller than 20 gauge loaded with slugs.
• harvest any species of wild game except deer with a shotgun loaded with slugs.
• use a shotgun capable of holding more than three shells in the magazine and chamber combined. Any shotgun having a capacity of more than three shells must be fitted with a one-piece plug that is irremovable without dismantling the shotgun or otherwise altered to render it incapable of holding more than three shells in the magazine and chamber combined. Except: This does not apply on licensed hunting preserves unless hunting wild migratory game birds and does not apply during Conservation Order light goose (snow, blue and Ross’ geese) seasons.
• use a rifle, handgun or airgun to harvest game birds or migratory game birds.
• discharge a rifle, handgun or airgun on, over or into water or ice.
• use a gun equipped with a silencer.
• possess any rifle in the field during the gun deer season (16-18 Nov and 29 Nov – 2 Dec 2018) except muzzleloading rifles used by deer hunters only. Note: The lawful possession of rifles to harvest furbearing mammals and game mammals other than deer shall not be prohibited during the Youth Deer Season (6-8 Oct 2018), muzzleloader rifle-only deer season (7-9 Dec 2018) and the Late-Winter Antlerless Only Deer Season, 27-30 Dec 2018 and 18-20 Jan 2019.

Hunting From Vehicles and Boats

It is unlawful to hunt, disturb, harass or harvest any protected bird or mammal by the use or aid of an automobile, vehicle or conveyance, any type of watercraft, aircraft or any machine propelled by mechanical power. Exception: Paraplegics or other disabled persons, with a permit from the Office of Law Enforcement, may hunt from any stationary motor vehicle or stationary motor-driven land conveyance. Note: It is legal to hunt game birds and game mammals (except deer and fur-bearing mammals) from a boat not camouflaged or disguised to alter its identity or further provide a place of concealment and not propelled by sail or mechanical power. A boat merely painted in a camouflage pattern is not considered camouflaged and may be used to hunt under conditions specified above. See exceptions to boat use in the Waterfowl Hunting section of this digest.

Hunting Near Inhabited Dwellings

It is unlawful to hunt or allow a dog to hunt within 300 yards of an inhabited dwelling without first obtaining permission of the owner or tenant of the dwelling. Except: A 100-yard restriction shall apply while trapping, hunting with bow and arrow, or hunting with shotgun using shotshells only, or on licensed game breeding and hunting preserve areas, on federally owned and managed lands, on IDNR-owned, -managed, -leased or -controlled lands.
It is unlawful to:

• molest or destroy any feed bed (a mound, pile or mat of branches, cattails or other vegetation gathered and piled by muskrats or beaver), nest, den, house or other animal activity.

### Dens, Nests and Feed Beds

It is unlawful to:

• use a mechanical device, smoke or gases to remove an animal from its den.

### Hunting Near Fires

It is unlawful to hunt adjacent to or near any peat, grass, brush or other flammable substance when it is burning.

### Hunting from Roads

It is unlawful to hunt, trap or discharge a gun or bow and arrow device along, upon, across or from a public roadway, highway or right-of-way. Highway (right-of-way) means the entire width between the boundary lines of every public road. Roadway means the portion of the public road that is improved or ordinarily used for vehicle travel, excluding the berm or shoulder.

### Transporting Shotguns on Boats

It is unlawful to place, carry, possess or transport a shotgun on a boat of any type in an area under the jurisdiction of IDNR from 1 Feb to 31 May inclusive, except persons having a valid, unfilled turkey permit and licensed or authorized hunters legally hunting wildlife in season.

### Transporting Firearms and Bow and Arrow Devices in Vehicles

It is unlawful to:

• have or carry a shotgun, rifle, handgun or airgun in or on any vehicle, conveyance or aircraft unless the firearm or airgun is unloaded and completely enclosed in a case except as noted in the Blinds section of Waterfowl Hunting in this digest. Also see Hunting From Vehicles and Boats and “FAQs” hereafter. This applies to concealed carry permit holders.
• carry a bow or bow and arrow device in or on a vehicle, conveyance or aircraft unless it is unstrung or enclosed in a case, or otherwise made inoperable.

### Guns in State Refuges

It is unlawful to carry or possess any gun in any state refuge except as provided by Administrative Rules.

### Night Hunting with Lights, Shining Wildlife

It is unlawful to use lights of, any light from, or any light connected to a vehicle or conveyance in areas where wildlife can be found. This does not prohibit normal use of headlamps for driving upon a roadway. Except: skunk, opossum, red or gray fox, coyote and raccoon may be harvested during the open season using a small hand-operated light by a person who is on foot and not in any vehicle.

### Field Trial and Dog Training

It is unlawful to:

• hold a field trial, organized night hunt, water race or other competitive event involving sporting dogs without first obtaining an IDNR permit. Applications must be submitted 4 weeks prior to the event.
• possess any firearm or ammunition other than a pistol loaded with blank cartridges while training dogs when hunting seasons are closed, except on an authorized field trial or dog training area. When training dogs from sunset to sunrise, no person in, along with, or accompanying the dog training party shall be in possession of a firearm or live ammunition, except pistols capable of firing only blank cartridges.
• operate a dog training area without first obtaining a wild game breeder’s permit (217) 785-3423 and dog training area permit (217) 785-8129 from IDNR. Complete information about field trials and dog training is available at www.dnr.illinois.gov.

### Falconry

State falconry permits, issued in accordance with federal regulations 50 CFR 21.29, are required to take, possess and transport hawks, falcons and great horned owls for falconry purposes. Call the Office of Law Enforcement for details at (217) 782-6431 or email Brian.Clark@illinois.gov.

### Feeding Wildlife

It is unlawful to make available food, salt, mineral blocks or other products for ingestion by wild deer or other wildlife in areas where wild deer are present at any time.

- elevated bird/squirrel feeders providing seed, grain, fruit, worms or suet for birds or squirrels located within 100 feet of a dwelling devoted to human occupancy.
- incidental feeding of wildlife within active livestock operations.
- feeding of wild animals, other than wild deer, by hand as long as a reasonable attempt is made to clean up unconsumed food.
- feeders for wildlife other than deer so long as deer are excluded from the feed in and around the feeder by fencing or other barriers.
- grain or other feed scattered or distributed solely as a result of normal agricultural, gardening or soil stabilization practices.
- standing, flooded or manipulated natural vegetation or food/seed deposited by natural vegetation.
- grain or other feed distributed or scattered solely as the result of manipulation of an agricultural crop or other feed on the land where grown, for purposes of dove hunting.
- food material placed for capturing or killing wildlife pursuant to 520 ILCS 5/2.37, 2.30, and 1.3.
- scientific permits issued pursuant to 17 Ill. Adm. Code 520 that allow food to attract wildlife.
- any other permits issued by IDNR that require the attraction of wildlife for purposes of management, research or control.

Violation of the provisions of this part is a Petty Offense with a maximum fine of $1,000. Hunting deer over bait is a separate offense.

### Hunter Interference Act

• It is unlawful to interfere with or disturb another person engaged in the lawful taking of a wild animal with intent to prevent the taking, or disturb or engage in an activity that will disturb wild animals, with intent to prevent their lawful taking.
• It is unlawful to use a drone in a way that interferes with another person’s lawful taking of wildlife or aquatic life. “Drone” means any aerial vehicle that does not carry a human operator.
Public Access
Hunting on Private Property

The Illinois Recreational Access Program (IRAP) leases private property throughout Illinois for semi-controlled public access for a variety of outdoor recreational opportunities. Landowners choose which outdoor recreational activities they agree to let the public to access while also retaining time for their personal outdoor activities on their property. Landowners also received habitat management assistance.

With more than 97% of Illinois privately owned, there are few public places available. IRAP focuses on finding places and activities for youth and families to experience the outdoors. More than 18,500 acres are enrolled in 49 counties throughout Illinois.

To find out more, go to https://www.dnr.illinois.gov/conservation/IRAP/Pages/default.aspx

IRAP Hunting Activities include:
Archery Deer: Oct 1-31
Spring turkey: Youth season and Seasons 3 & 4
Waterfowl: December, legal seasons for each zone
Small Game: Squirrel: Aug 1 – Sept 15
Rabbit: Dec 10-31
Quail /Pheasant: Dec 10-31

Other Activities are:
Canoe/Kayak
Fishing
Hiking, Birding

The IRAP is funded through the Voluntary Public Access – Habitat Incentive Program from the FDA Farm Bill, administered by NRCS
**Purple Paint Law**

Landowners or lessees can mark trees or posts on private land with purple paint as a “no trespassing” notice.

**Damaging Property while Hunting**

It is unlawful to damage or destroy another person's property while hunting or trapping on his/her land.

**Private Land Permission and Access**

It is unlawful for any person to take (see definition of “take” above) or attempt to take any species of wildlife or parts thereof or intentionally or wantonly allow a dog to hunt, within or upon the land of another, or upon waters flowing over or standing on the land of another, or to knowingly shoot a gun or bow and arrow device at any wildlife physically on or flying over the property of another without first obtaining permission from the owner or the owner's designee. For the purposes of this law, the owner's designee means anyone whom the owner designates in a written authorization and the authorization must contain (i) the legal or common description of property, (ii) the extent that the owner's designee is authorized to make decisions regarding who is allowed to take or attempt to take any species of wildlife or parts thereof, and (iii) the owner's notarized signature.

Private land owners may grant permission for hunting, fishing or other recreational activities on their property, and in most instances, shall not be held liable for injuries to those accessing the property. Limitations exist. Refer to [http://www.dnr.gov/legislation/ics/ics3.asp?ActID=2018&ChapterID=58](http://www.dnr.gov/legislation/ics/ics3.asp?ActID=2018&ChapterID=58) for more information. Illinois law does not grant the right of trespass for the purpose of retrieving wounded or crippled wildlife or hunting dogs. Secure permission from the landowner or tenant before entering any property. Your conduct while hunting and trapping can influence the landowner's decision to allow future hunting or trapping. Note: Railroad rights-of-way are private property and permission from the owner is needed before hunting or trapping.

For your convenience, IDNR has developed this form for hunters to attain written permission from the landowner(s): [https://www.dnr.illinois.gov/hunting/Documents/PermissionCard.pdf](https://www.dnr.illinois.gov/hunting/Documents/PermissionCard.pdf)

**Protection and Care of Wildlife**

All wild birds (EXCEPT the house sparrow, European starling and domestic pigeon) and parts thereof (their nests and eggs) are protected. Wild turkey and game birds listed in this digest are legal to harvest.

Wild mammals and parts thereof, including their green hides, are protected EXCEPT as authorized by a hunting or trapping season, and include: woodchuck, gray squirrel, fox squirrel, eastern cottontail rabbit, swamp rabbit, white-tailed deer, muskrat, beaver, raccoon, opossum, least weasel, long-tailed weasel, mink, striped skunk, red fox, gray fox, river otter, bobcat, badger and coyote.

Wild mammals and parts thereof, including their green hides, are protected throughout the year and include: all white (albino) white-tailed deer, grey/timber wolves, flying squirrel, red squirrel, white squirrel, eastern woodrat, golden mouse, rice rat, bats, mountain lion and black bear. Note: piebald deer are legal to harvest. It shall be unlawful for any person to take any other living wild animal not covered above without the permission of the landowner or tenant.

It is unlawful to take, possess or sell for sale any such wild birds (dead or alive) and parts thereof (including their nests and eggs), or such wild mammals (dead or alive) and parts thereof, including their green hides, contrary to the provisions of the Illinois Wildlife Code.

It is unlawful to bring into Illinois for the purpose of holding, releasing, propagating or selling any other living wild animal not listed under the Protected Species section above without first obtaining a DNR permit. Contact Division of Wildlife Resources (217) 782-6384.

**Outfitter Regulation Information**

The development of outfitter regulations was initiated by concerned hunters and outfitters. Their interests were to ensure hunters utilizing outfitters were provided the proper services and treatment, to strengthen the reputation of the outfitting industry in Illinois, and to ensure the proper management of the state’s deer herd, wild turkey flock, and waterfowl resource. To apply for an Outfitter Permit or obtain a complete copy of the regulations contained in Admin. Rule 640 may be found at [www.dnr.illinois.gov](http://www.dnr.illinois.gov) or by contacting the Office of Law Enforcement (217) 782-6431.

**Releasing Wildlife and Possessing Live Wildlife**

It is unlawful to:

- release from captivity any wildlife except as authorized by IDNR or as authorized by permits for a field trial, dog training area, game breeding and hunting preserve area, or wild game and bird breeder permits.
- carry into this state alive or possess alive any species of protected wildlife taken outside of this state without first obtaining IDNR permission, except licensed game breeders, as permitted by the Illinois Wildlife Code.
- release turkeys in Illinois except IDNR employees and licensed hunting preserve operators authorized to release turkeys for the purpose of hunting.
- take wildlfe and retain it alive.

**Hawks, Eagles and Owls Protected**

It is unlawful to harvest, or attempt to harvest, molest or disturb any hawk, eagle or owl (including nests and eggs), at any time, except as provided by falconry regulations.

**If You Find An Injured Or Orphaned Animal**

Most birds and mammals in Illinois are considered a protected species and picking up or possessing the animal outside of a legal hunting season is unlawful.

If you suspect an animal is injured or orphaned, do not attempt to rescue the animal, call a wildlife rehabilitator immediately.

Go to: [http://web.extension.illinois.edu/wildlife/injured.cfm](http://web.extension.illinois.edu/wildlife/injured.cfm) for a rehabilitator in your county.

Stay calm and quiet when you are around the animal and leave it alone to minimize stress.

Do not feed or provide fluids to the animal.

**Possession of Captive-reared Game Mammals and Birds**

It is unlawful to hold, possess or engage in the raising of game mammals, game birds or migratory game birds without obtaining a Class A Noncommercial or Class B Commercial Game and Game Bird Breeders Permit. Permit holders must keep detailed records of the acquisition and disposal of each species. Class B permit holders must keep records of sales. Records must be available for inspection by IDNR and peace officers. Complete regulations are available in the Wildlife Code [520 ILCS 5/3.23] at [http://www.illinois.gov/legislation/ics/ics3.asp?ActID=1729&ChapterID=43](http://www.illinois.gov/legislation/ics/ics3.asp?ActID=1729&ChapterID=43)

**Taxidermy Laws**

Any person who engages in the business of taxidermy must obtain a IDNR permit. Persons taking animals to a taxidermist must be able to prove that the animal was legally harvested. Taxidermists are required to keep written records of all animals received. All animals in their possession must be properly tagged or labeled. For further information contact a IDNR office.

**Purple Paint Law**

Landowners or lessees can mark trees or posts on private land with purple paint as a “no trespassing” notice.

**Damaging Property while Hunting**

It is unlawful to damage or destroy another person's property while hunting or trapping on his/her land.

**Private Land Permission and Access**

It is unlawful for any person to take (see definition of “take” above) or attempt to take any species of wildlife or parts thereof or intentionally or wantonly allow a dog to hunt, within or upon the land of another, or upon waters flowing over or standing on the land of another, or to knowingly shoot a gun or bow and arrow device at any wildlife physically on or flying over the property of another without first obtaining permission from the owner or the owner's designee. For the purposes of this law, the owner's designee means anyone whom the owner designates in a written authorization and the authorization must contain (i) the legal or common description of property, (ii) the extent that the owner's designee is authorized to make decisions regarding who is allowed to take or attempt to take any species of wildlife or parts thereof, and (iii) the owner's notarized signature.

Private land owners may grant permission for hunting, fishing or other recreational activities on their property, and in most instances, shall not be held liable for injuries to those accessing the property. Limitations exist. Refer to [http://www.dnr.gov/legislation/ics/ics3.asp?ActID=2018&ChapterID=58](http://www.dnr.gov/legislation/ics/ics3.asp?ActID=2018&ChapterID=58) for more information. Illinois law does not grant the right of trespass for the purpose of retrieving wounded or crippled wildlife or hunting dogs. Secure permission from the landowner or tenant before entering any property. Your conduct while hunting and trapping can influence the landowner's decision to allow future hunting or trapping. Note: Railroad rights-of-way are private property and permission from the owner is needed before hunting or trapping.

For your convenience, IDNR has developed this form for hunters to attain written permission from the landowner(s): [https://www.dnr.illinois.gov/hunting/Documents/PermissionCard.pdf](https://www.dnr.illinois.gov/hunting/Documents/PermissionCard.pdf)

**Protection and Care of Wildlife**

All wild birds (EXCEPT the house sparrow, European starling and domestic pigeon) and parts thereof (their nests and eggs) are protected. Wild turkey and game birds listed in this digest are legal to harvest.

Wild mammals and parts thereof, including their green hides, are protected EXCEPT as authorized by a hunting or trapping season, and include: woodchuck, gray squirrel, fox squirrel, eastern cottontail rabbit, swamp rabbit, white-tailed deer, muskrat, beaver, raccoon, opossum, least weasel, long-tailed weasel, mink, striped skunk, red fox, gray fox, river otter, bobcat, badger and coyote.

Wild mammals and parts thereof, including their green hides, are protected throughout the year and include: all white (albino) white-tailed deer, grey/timber wolves, flying squirrel, red squirrel, white squirrel, eastern woodrat, golden mouse, rice rat, bats, mountain lion and black bear. Note: piebald deer are legal to harvest. It shall be unlawful for any person to take any other living wild animal not covered above without the permission of the landowner or tenant.

It is unlawful to take, possess, sell or offer for sale any such wild birds (dead or alive) and parts thereof (including their nests and eggs), or such wild mammals (dead or alive) and parts thereof, including their green hides, contrary to the provisions of the Illinois Wildlife Code.

It is unlawful to bring into Illinois for the purpose of holding, releasing, propagating or selling any other living wild animal not listed under the Protected Species section above without first obtaining a DNR permit. Contact Division of Wildlife Resources (217) 782-6384.

**Outfitter Regulation Information**

The development of outfitter regulations was initiated by concerned hunters and outfitters. Their interests were to ensure hunters utilizing outfitters were provided the proper services and treatment, to strengthen the reputation of the outfitting industry in Illinois, and to ensure the proper management of the state’s deer herd, wild turkey flock, and waterfowl resource. To apply for an Outfitter Permit or obtain a complete copy of the regulations contained in Admin. Rule 640 may be found at [www.dnr.illinois.gov](http://www.dnr.illinois.gov) or by contacting the Office of Law Enforcement (217) 782-6431.
Every hunting or trapping accident involving serious personal injury (death, internal injury, broken bones, loss of an appendage, disfigurement, etc.) including falls from elevated tree stands or a gunshot or archery wound must be reported to IDNR within 5 days. Persons involved in a hunting or trapping accident must render assistance to persons affected by the accident provided they can do so without serious danger to themselves and others. Accidents must be reported on forms obtained from the Safety Education Section at 1-800-832-2599 or [https://www.dnr.illinois.gov/safety/Pages/IncidentReportSummaries.aspx](https://www.dnr.illinois.gov/safety/Pages/IncidentReportSummaries.aspx)

### Authority of Conservation Police Officers (CPOs)

All Conservation Police Officers are empowered, pursuant to law, to enter all lands and waters to enforce the provisions of the Wildlife Code and Administrative Rules.

### Serving Since 1885 Illinois Conservation Police

To be a vigilant guardian of the natural resources, public safety and homeland security of Illinois.

The Illinois Conservation Police would like to thank YOU, the sportsmen of Illinois, for your continued support over the last 127 years. It’s your passion for conservation that has enabled us to protect the natural resources of this great state while providing a safe place to enjoy the outdoors. Our unique partnership will continue to provide future generations with lifelong outdoor recreational opportunities.

### Contacting a Conservation Police Officer

The Department of Natural Resources’ Office of Law Enforcement developed the Target Illinois Poachers program to encourage any concerned citizen who witnesses a poaching offense to report the violation. The toll-free number is (877) 2DNRLAW (1-877-236-7529). Simply defined, “poaching” is the illegal taking or possession of game and non-game animals, fish or other resources. Hunting out of season and hunting at night with spotlights are two of the most obvious signs of poaching. Hunters and fishermen possessing more than the legal limit is another. Slow-moving or partially hidden vehicles, shots heard at unusual hours or game being concealed are all suspect.

But there is another serious problem that affects everyone: pollution. If you are aware of improper dumping or any other potential environmental crime, please report it. If you locate an environmental hazard, keep a safe distance and call the TIP hotline with the details at (877) 2DNRLAW (1-877-236-7529).

Good law enforcement is everybody’s responsibility. If you see a violation, report it. Let’s Target Illinois’ Poachers and Polluters!

### REPORT VIOLATIONS TO:

**1-877-2DNRLAW (236-7529)**

Operates 24 hrs./day, 7 days a week. Contact a CPO:

[https://www.dnr.illinois.gov/Law Enforcement/Documents/DistrictCPOPPhonesAndEmails.pdf](https://www.dnr.illinois.gov/Law Enforcement/Documents/DistrictCPOPPhonesAndEmails.pdf)

Ameritech Relay 1-800-526-0644 for the deaf and hearing impaired.

For all other requests for an Illinois Conservation Police Officer after regular business hours, contact your Illinois State Police district HQ dispatch center.
Illinois is a participating member of the Interstate Wildlife Violator Compact.

**How the IWVC works:**
- Compact membership applies to aquatic life and wildlife violations.
- The Compact allows non-resident violators receiving citations for violations in participating states to be treated the same as residents who are in violation.
- A violator who fails to comply with the terms of a citation issued in a participating state faces the possibility of the suspension of his/her privileges in his/her home state until the terms of the citation are met.
- The Compact provides for the reciprocal recognition of the suspension of license privileges by participating states. (Illinois has recognized suspensions imposed by other states for several years. Membership in the Compact allows other states to recognize Illinois’ suspensions.)
- The Compact provides that information on convictions in participating states may be forwarded to the home state of the violator.
- IWVC not only assures equal treatment of residents and non-residents of participating states, but also enhances the law enforcement services and deterrent value of time spent patrolling by uniformed officers. The reciprocal recognition of suspensions between states is intended to address the problems associated with the mobility of many violators.

**Compact Member States:**

**Statewide Regulations FAQs**

**Can I use a centerfire rifle for hunting in Illinois? Or handguns?**
A: The following species may be harvested with a rifle or handgun: coyote, striped skunk, woodchuck, squirrel, raccoon, opossum and red and gray fox. We do not regulate the caliber of handgun or rifle that may be used, except on state-owned or managed areas, which normally allow only the use of shotguns or .22 caliber rifles. Squirrel, furbearers and woodchuck hunters may use a .17 caliber rifle or on some state-owned or managed areas. No rifles may be possessed in the field, however, during firearm deer season except that trappers may carry a .22 rifle to dispatch animals during firearm deer season. Certain handguns are lawful for deer hunting. At all times when in possession of firearms, hunters must comply with all firearms regulations as outlined in the Illinois Criminal Code.

**Can I use walkie-talkies or cell phones to keep in touch with my hunting partners while in the field hunting?**
A: Yes.

**Can I use a scope on my gun or bow?**
A: Yes.

**Can I use a shotgun primer as a percussion cap for my muzzleloader?**
A: Yes. A shotgun primer is a type of percussion cap and therefore legal for use in hunting with muzzleloaders.

**Do I need a F.O.I.D. card to hunt with a muzzleloader?**
A: Yes. Illinois residents possessing or using modern muzzleloading firearms are required to have a valid F.O.I.D. card.

**Is there a set distance from a roadway I have to be in order to hunt?**
A: No. There is no set distance. It is simply unlawful to hunt, trap, or discharge a gun or bow and arrow device along, upon, across or from a public roadway, highway, or right-of-way.

**Is there a set distance from another person’s property I must be in order to hunt?**
A: No. But there are a couple of issues to keep in mind. One, you must have permission to hunt from the landowner or tenant before you enter their property. That includes tracking wounded game. Although it is illegal to kill game and not make an attempt to retrieve it, your attempt ends if you are not granted access to the property where the animal goes. Second, you cannot hunt within 100 yards of an inhabited dwelling if hunting with bow and arrow device or shotgun loaded with shot shells (or 300 yards if using a rifle, handgun or deer slugs) unless you have permission from the person occupying the dwelling. You could theoretically be on your own property but it is too close to another person’s dwelling, and you don’t have permission from the person who occupies that dwelling, you can’t hunt there.

**How may I safely and legally transport a firearm in a vehicle?**
A: Residents of Illinois must possess a valid Firearms Owner’s Identification Card (F.O.I.D.) and the firearm must be unloaded and enclosed in a case (see definition of “case” in “Definitions”). Unloaded and properly enclosed firearms can be placed anywhere in the vehicle. (See Transporting Bow and Arrow Devices in Vehicles).

**How may I safely and legally transport ammunition in a vehicle?**
A: The location of ammunition being transported, including ammunition being transported in loaded magazines, is not regulated as long as the firearm is unloaded and encased, and the resident possessing the firearm/ammunition holds a valid F.O.I.D. card.

**How may I legally transport firearms and ammunition in another state?**
A: The particular state in which you will be traveling should be contacted for that information.

**Where can I get more information on transporting firearms?**
A: For more information, contact: Illinois State Police at (217) 782-6637, or the F.O.I.D. office at (217) 782-7980, www.isp.state.il.us; or IDNR’s Clearinghouse at (217) 782-7988, www.dnr.illinois.gov and ask for the brochure “Transport Your Gun Legally – Commonly Asked Questions on Transporting Firearms.”

**What are the most frequently cited areas of violation?**
A: Hunting without permission, hunting deer over a baited area, hunting after legal hours, permit violations (no permit in possession or using someone else’s permit), not wearing blaze orange or blaze pink when required, no or wrong license/permission, hunting from a vehicle, uncased or loaded gun in vehicle, using shotgun capable of holding more than three rounds, falsifying licenses or permits.
### DEER SEASON DATES AND LIMIT

** No hunter, regardless of the quantity or type of permits in his/her possession, may harvest more than two antlered deer during a year, including the youth, archery, muzzleloader and firearm seasons. For this harvest limit, deer seasons are in the same year if their opening dates are within the same 12-month period that begins July 1.
To hunt deer, residents and non-residents will need a base hunting license, one of the habitat stamps, and at least one pertinent deer permit listed in the Deer Hunting Credentials table. Exemptions to these requirements are specified in table. For residency qualification, see Resident definition in Statewide Regulations.

- **ES** = deer of either sex; **AO** = antlerless-only deer.

License fees in table do not include potential vendor transaction fee.

It is unlawful to:
- hunt deer without a IDNR permit.
- hunt deer unless the permit is properly signed and in the hunter’s possession while hunting.
- transfer, loan, use, possess, or falsify any license, permit, tag, or harvest record issued to another person.
- harvest an antlered deer with an antlerless-only permit. An antlered deer is defined as a deer having at least one antler of a length of 3 inches or more. An antlerless deer is defined as a deer without antlers or a deer having antlers less than 3 inches long.
- hunt deer in a county or area other than specified on the permit.
- move, transport or field dress a deer upon kill before properly attaching the temporary harvest tag as instructed on the permit. Deer must be tagged immediately upon kill.

Deer Harvest Limit

- It is unlawful to kill more than one deer per permit during the archery season or more than one deer per permit during the firearm seasons.
- No hunter, regardless of the quantity or type of permits in his/her possession, may harvest more than two antlered deer during a year, including the youth, archery, firearm and muzzleloader seasons.
- For the purpose of this harvest limit, deer seasons are considered to be in the same year if their opening dates are within the same 12-month period that begins July 1.
- Deer harvested during the Special CWD Deer Season (select counties only) do not count toward the antlered buck limit.
- It is unlawful to harvest any all-white (albino) white-tailed deer at any time. Pie-bald deer are legal to harvest.

Clothing Requirements

A solid blaze orange or blaze pink cap/hat and an upper outer garment displaying at least 400 square inches of solid blaze orange or blaze pink material must be worn:

- to hunt deer during all firearm deer seasons.
- to track wounded deer with a dog during all firearm deer seasons.
- by individuals accompanying youth during youth firearm deer hunts.

Camouflage blaze orange or camouflage blaze pink material does not meet the requirements.

Treestand Requirements

It is unlawful to:

- use more than one tree stand at an IDNR owned or managed site.
- construct or use any tree stand using nails, screws or any device which pierces or cuts the bark of the tree on which it is installed on an IDNR owned or managed site. Tree stands must be portable and removed at the end of each day, unless otherwise specified in site-specific regulations.

Windshield Cards For Public Land Hunting/Trapping

Free “Windshield Cards” are required to hunt deer and record hunting effort/harvest at many Illinois Public Hunting Areas. Cards are available at: https://dnr.illinois.gov/windshieldcard/index.asp. Print a card for each site you intend to hunt and place on the dashboard of your vehicle when hunting the site. Each hunter will need to display a windshield card. For information or assistance, contact the site where you intend to hunt.

Hunters are required to return to this website prior to Feb. 15 each year to record harvest information.

Deer Hunting Regulations

Firearm and Archery Equipment Regulations

It is unlawful to:

- have in possession any firearm other than legal for that season and permit when hunting deer with a shotgun, handgun or muzzleloader. However, more than one firearm may be possessed by a firearm deer hunter provided it is a lawful gun for that particular season (also see Statewide Regulations on use of concealed carry handguns).
- possess any rifle in the field during firearm deer season except muzzleloading rifles used by deer hunters only. NOTE: The lawful possession of rifles to harvest furbearing mammals and game mammals other than deer shall not be prohibited during the youth deer hunting season, muzzleloading rifle-only deer season and CWD and Late Winter antlerless only deer season.
- carry a loaded gun or bow with a nocked arrow in the field except during legal hunting hours.

Bow Hanger

On Your Tree in Seconds No More Screw in Hooks Legal on All State and Federal Land
Hunting Deer with Dogs, Horses, Vehicles, Boats and Aircraft

It is unlawful to use a dog, horse, automobile, aircraft, boat or other vehicle to harvest deer with a firearm or bow and arrow. Dogs may, however, be used to track wounded deer if the following conditions are met:

- Any person using a dog for tracking wounded deer must maintain physical control of the dog at all times by means of a maximum 50 foot lead attached to the dog’s collar or harness.
- Tracking wounded deer is permissible at night, but at no time outside of legal deer hunting hours or seasons shall any person handling or accompanying a dog being used for tracking wounded deer be in possession of any firearm or archery device.
- Persons tracking wounded deer with a dog during the firearm seasons shall wear blaze orange or blaze pink as required.
- Dog handlers tracking wounded deer with a dog are exempt from hunting license and deer permit requirements so long as they are accompanied by the licensed deer hunter who wounded the deer. It is unlawful to track deer with dogs on any IDNR-owned or -managed site during hours when deer hunting is open on the site.

Mandatory Deer Harvest Registration

All deer harvested during muzzleloader, archery, late winter antlerless, special CWD seasons and during firearm season in counties without CWD surveillance during firearm, muzzleloader, archery, late winter antlerless, or special CWD season must be registered by 10 p.m. on the same calendar day the deer was harvested by calling the toll-free telephone check-in system at 1-866-452-4325 (1-866-ILCHECK) or by accessing the online check-in system at https://www.dnr.illinois.gov/hunting/Pages/HarvestReporting.aspx.

- Counties with CWD surveillance are: Boone, DeKalb, Grundy, Jo Daviess, Kane, Kankakee, Kendall, LaSalle, Livingston, McHenry, Ogle, Stephenson, Will, and Winnebago (deer harvested in these counties during firearm deer season need to be physically registered at a designated check station, see Firearm and Muzzleloader Deer Hunting).
- Successful hunters must register their harvest and receive a permanent leg tag (provided at the check station) or harvest confirmation number (telephone check-in or on-line check-in).
- The harvest confirmation number must be written by the hunter onto the temporary harvest tag (leg tag). If the condition of the tag precludes writing on the tag in the appropriate space (i.e., bloody, etc.), the confirmation number shall be written elsewhere on the tag, or onto a piece of paper and attached to the deer along with the temporary harvest tag.
- The deer must remain whole (or field dressed) until it has been checked in.
- In instances where deer are checked in while the hunter is still afield, the deer may not be dismembered while afield beyond quartering the animal. If quartered, all parts of the carcase (except the entrails removed during field dressing) must be transported together and evidence of sex must remain naturally attached to one quarter. Evidence of sex is:
  A) For a buck: head with antlers attached to carcass, or attached testicle, scrotum or penis.
  B) For a doe: head attached to carcass or attached udder (mammary) or vulva.
- The temporary harvest tag (leg tag) and confirmation number or permanent leg tag must remain attached to the deer until it is at the legal residence of the person who legally took or possessed the deer, the deer has been checked in, and final processing is complete.

Transportation

- To taxidermist – if the head/antlers are delivered to a taxidermist for processing, the confirmation number/temporary harvest tag must be recorded on the ‘head tag’ portion of the permit and both must remain with the deer at the taxidermist.
- To meat processor – if the carcass is taken to a meat processor, the permanent tag or temporary harvest tag (leg tag) with confirmation number must remain with the deer while it is processed, and until it is at the legal residence of the person who legally took or possessed the deer.
- To tanner – persons delivering deer/parts of a deer to a tanner for processing must supply the tanner with their deer permit number to verify lawful acquisition. In the absence of a permit number, the tanner may rely on the written certification of the person from whom the deer was received that the specimen was legally harvested or obtained.

Exportation of Deer by Non-residents

Non-resident hunters who harvest a wild deer in Illinois should contact the state wildlife agency in states they will be traveling through, including their home state, to inquire about regulations related to possession/transportation of deer carcasses and/or parts of carcasses through the state in question as regulations vary from state to state.

Importation of Animal Carcasses and Parts

Importation of hunter-harvested deer and elk carcasses into Illinois is prohibited except:

- deboned meat, antlers, antlers attached to skull caps, hides, upper canine teeth (also known as “buglers,” “whistlers,” or “ivories”). Skull caps shall be cleaned of all brain and muscle tissue;
- finished taxidermists mounts;
- carcasses or parts of carcasses with the spinal column or head attached may be transported in the state only if they are submitted to a licensed meat processor or a licensed taxidermist for processing within 72 hours after entry; licensed meat processors and taxidermists shall dispose of all inedible tissue not listed in the first dot point in a properly permitted landfill or with a renderer;
- tissues can be imported into the state for use by a diagnostic or research laboratory.

NOTE: Nothing in this Part shall prevent renderers regulated under the Illinois Dead Animal Disposal Act [225 ILCS 610] with Class A or B licenses from transporting cervid carcasses or parts into the state for the purpose of rendering.

Driving Deer on IDNR-controlled Properties

It is unlawful to “drive deer”, or participate in a deer drive, on IDNR-owned or -managed properties during all deer seasons.

Hunting Deer Over Salt, Mineral or Bait

It is illegal to feed deer at any time and/or harvest deer by the use of bait or baiting of any kind. Despite their widespread availability, deer baits and attractants commonly sold in stores are also illegal to use at any time except for use by properly licensed owners of captive cervids while feeding captive animals. For the purpose of this section, “bait” means any material, whether liquid or solid, including food, salt, minerals and other products that can be ingested, placed or scattered in such a manner as to attract or lure white-tailed deer. “Baiting” means the placement or scattering of bait to attract deer.

For the purposes of taking white-tailed deer, nothing in this section shall be construed to prevent the manipulation, including mowing or cutting, of standing crops as a normal agricultural or soil stabilization practice, food plots or normal agricultural practices, including planting, harvesting and maintenance, such as cultivating, or the use of products designed for scent only and not capable of ingestion, solid or liquid, placed or scattered, in such a manner as to attract or lure deer.

DEER HUNTING

www.dnr.illinois.gov
Legal Hunting Equipment

- Shotguns, loaded with slugs only, of not larger than 10 nor smaller than 20 gauge, not capable of firing more than three consecutive slugs; or
- Single or double barreled muzzleloading rifles of at least .45 caliber shooting a single projectile through a barrel of at least 16 inches in length; or
- Centerfire revolvers or centerfire single-shot handguns of .30 caliber or larger with a minimum barrel length of 4 inches.
- A muzzleloading firearm is defined as a firearm that is incapable of being loaded from the breech end.
- Only blackpowder or a "blackpowder substitute" such as Pyrodex may be used. Modern smokeless powders (nitrocellulose-based) are an approved blackpowder substitute only in muzzleloading firearms specifically designed for their use.
- Percussion caps (shotgun primers are legal percussion caps), wheellock, matchlock or flint type ignition only may be used, except a muzzleloader with an electronic ignition is legal to use.
- A muzzleloading firearm is considered unloaded when: removal of percussion cap or removal of prime powder from frizzen pan with frizzen open and hammer all the way down or removal of prime powder from flashtube and wheel un-wound or removal of prime powder and match with match not lit, or removal of the battery from the electronic ignition muzzleloader.
- Archery equipment meeting all legal requirements as outlined in the Archery Deer Hunting section hereafter.

Legal Ammunition

- For shotguns and muzzleloading firearms, the minimum size of the projectile shall be .44 caliber. A wad or sleeve is not considered a projectile or a part of the projectile.
- For centerfire revolvers and centerfire single-shot handguns the minimum size of the projectile shall be .44 caliber.
- For shotguns, loaded with slugs only, of not larger than 10 nor smaller than 20 gauge, not capable of firing more than three consecutive slugs; or
- Single or double barreled muzzleloading rifles of at least .45 caliber shooting a single projectile through a barrel of at least 16 inches in length; or
- Centerfire revolvers or centerfire single-shot handguns of .30 caliber or larger with a minimum barrel length of 4 inches.
- A muzzleloading firearm is defined as a firearm that is incapable of being loaded from the breech end.
- Only blackpowder or a "blackpowder substitute" such as Pyrodex may be used. Modern smokeless powders (nitrocellulose-based) are an approved blackpowder substitute only in muzzleloading firearms specifically designed for their use.
- Percussion caps (shotgun primers are legal percussion caps), wheellock, matchlock or flint type ignition only may be used, except a muzzleloader with an electronic ignition is legal to use.
- A muzzleloading firearm is considered unloaded when: removal of percussion cap or removal of prime powder from frizzen pan with frizzen open and hammer all the way down or removal of prime powder from flashtube and wheel un-wound or removal of prime powder and match with match not lit, or removal of the battery from the electronic ignition muzzleloader.
- Archery equipment meeting all legal requirements as outlined in the Archery Deer Hunting section hereafter.

Permit Requirements

- Firearm deer hunters must have a current, valid Firearm Deer Season Permit or unfilled Property-only Landowner/Tenant Firearm Deer permit.
- Muzzleloading rifle deer hunters must have a current, valid Muzzleloading Rifle Deer Season Permit, or an unused Property-Only Landowner/Tenant Deer Permit valid for that year’s Firearm Deer Season.
- Unfilled Landowner Firearm Deer Permits shall be valid only on lands owned/leased by the permit holder, and the holder must use a shotgun or muzzleloading rifle.

Deer Permit Application Process

- Apply for a deer permit here: https://www.dnr.illinois.gov/LPR/Pages/DeerPermitsFees.aspx
- To receive hardcopy application forms for a firearm or muzzleloader deer hunting permit, contact the IDNR Chicago office at (312) 814-2070 or the Springfield permit office at (217) 782-7305.
- Applicants please allow approximately 4 weeks after the respective application deadline dates for Lottery Drawing results.

Disabled Hunter Opportunities

See the following link for opportunities: https://www.dnr.illinois.gov/D00/Pages/events.aspx. Additional hunts may be available, contact Jay Williams at jay.d.williams@illinois.gov.

- **First Lottery:** Only resident hunters may apply for firearm season permits and special muzzleloader season permits during the first lottery. Permits are issued using a computerized lottery, and successful applicants receive their permits in July. Applicants wanting to determine whether they were successful before the second lottery deadline can check online at http://www.dnr.illinois.gov/hunting/deer/Pages/OnlineDeerPermitInquirySystem.aspx.
- **Second Lottery:** Resident hunters who were rejected for a deer permit during the first lottery, who are applying for their first permit, or who are non-residents may apply for firearm and muzzleloader deer permits during this lottery. Applicants may apply for one either-sex deer permit and one bonus antlerless-only deer permit to be allocated from permits remaining after the first lottery. Illinois residents have preference over non-residents in this lottery.
- **Third Lottery:** Residents and non-residents may apply for additional firearm or muzzleloader permits left over from the county quotas. Anyone (regardless of other deer permits they may have) may apply for one or more permits in this lottery.
- **Over-the-Counter Sales Period:** Permits remaining after the Third Lottery Drawing will be available to residents and non-residents over-the-counter from license vendors throughout the state on a first-come, first-served basis. Permits will be sold until quotas are exhausted, or until the close of the firearm deer season, whichever occurs first.
- **Permit Limit:** Prior to the Third Lottery Drawing in August, no hunter may receive, or attempt to receive, more than one either-sex permit and one antlerless-only permit for the firearm or muzzleloader deer season.
DEER HUNTING

Mandatory Firearm Harvest Reporting and Transportation In counties with CWD surveillance

Boone, DeKalb, Grundy, Jo Daviess, Kane, Kankakee, Kendall, LaSalle, Livingston, McHenry, Ogle, Stephenson, Will and Winnebago

- Successful firearm season hunters must take their deer either whole or field-dressed to a designated firearm deer check station on the same day it was killed.
- Daily check station hours are 8 a.m.-8 p.m.
- A permanent harvest tag will be attached to the leg of the deer upon registration at the check station.
- If not able to locate a harvested deer in sufficient time to enable checking it in by 8 p.m., the hunter must take the deer to the appropriate check station upon its opening at 8 a.m. the following morning, or immediately upon retrieving it if that occurs later than the opening of the check station. If this situation occurs on a Sunday, the hunter must contact the appropriate regional IDNR Law Enforcement office by 10 a.m. Monday morning for instructions on checking the deer.
- Successful hunters using their muzzleloader deer permits during the second weekend of the firearm season may, at their option, register their harvest either electronically (via phone-in or on-line registration) or at a designated firearm deer check station by 8 p.m. on the day the deer was killed.

Archery Deer Hunting

Legal Archery Equipment

- A long, recurve or compound bow with a minimum pull of 30 pounds at some point within a 28-inch draw. Minimum arrow length is 20 inches.
- A crossbow with minimum draw weight of 125 pounds; minimum overall length of 24 inches; have a working safety; and used with fletched bolts or arrows of not less than 14 inches.
- Broadheads must be used and may have fixed (must be metal or flint-, chert- or obsidian-knapped) or expandable (must be metal) cutting surfaces, but they must have a minimum 7/8 inch diameter when fully opened.
- Electronic tracking systems utilizing radio-telemetry are illegal.
- Archery equipment use is legal on private land ONLY during Firearm Deer Season, provided the hunter has a valid county firearm deer permit. Archery hunting is not allowed using an Archery Deer Permit during the Firearms Deer Season in counties open to firearm deer hunting.
- It is unlawful to have any firearm in possession while hunting deer with a bow and arrow or crossbow (but see Statewide Regulations on use of concealed carry handguns).

Resident Permits and Limits

Resident antlerless-only and combination archery deer permits can be purchased without limit from your local hunting license vendor. Resident hunters may apply for only one of the single either-sex permits on paper applications printed from 1 Aug–1 Sep (www.dnr.illinois.gov) with an application deadline of 1 September.

Nonresident Permits and Limits

- Nonresidents may apply for and receive only one archery combination permit per license year. A non-resident landowner who has obtained landowner archery permits is also eligible for one combination non-resident archery permit.
- Applications are accepted 1-30 June via DNR Direct Online License Sales at www.dnr.illinois.gov.
- The number of permits is limited to 25,000, with clients of outfitters licensed by IDNR given preference in the drawing for the first 7,500. Clients of licensed outfitters should contact the outfitter prior to applying to receive a certification number to be used in the application process to verify their outfitter client status. Permits will be allocated using a computerized, random lottery drawing conducted after June 30. If the number of eligible outfitter clients in the drawing is less than 7,500, all remaining permits will be allocated to the remaining applicants until the quota is reached. If the number of eligible outfitter clients in the drawing exceeds 7,500, those outfitter clients unsuccessful in obtaining one of the first 7,500 permits will compete against non-client applicants for the remaining 17,500 permits.
- Nonresident archery deer permits issued to outfitter clients who received a permit based on the preference given to outfitter clients are valid only on property controlled by the outfitter used to gain preference; all other archery permits are valid statewide.
- Any permits remaining after the drawing will be sold on a first-come, first-serve basis.
- Nonresidents who have previously obtained either a Nonresident Combination Archery Deer Permit or a Nonresident Landowner Archery Deer Permit may purchase single antlerless-only archery deer permits for a fee of $25. Nonresidents without one of those permits will be charged a fee of $100. There is no limit for single antlerless-only permits.
- Nonresidents may not purchase a combination archery deer permit after 30 September if they have previously purchased any single antlerless-only archery deer permit.

Archery Deer Hunting

Learn to Hunt

The Learn to Hunt program provides FREE educational workshops aimed at teaching ADULT participants how to hunt deer, turkey, small game, upland game, and waterfowl.

www.dnr.illinois.gov
County-specific Deer Archery Change
The following regulation change was not finalized as of the printing of this digest. Consult the IDNR website as the season approaches for further information.
To grow deer populations to their appropriate county goals, only antlered deer may be harvested during the 1–15 October period of archery season in the following counties: Champaign, Douglas, Macon, Moultrie, Piatt. After October 15, archery regulations are the same as the rest of the state. Firearms deer permits have already been decreased considerably in these counties and archery harvest, which accounts for half or more of deer harvest, must be managed to allow deer to increase.

Late Winter Antlerless Deer Hunting

Counties Open to Hunting (all harvest is checked electronically via phone-in or on-line registration)
Information and a map of counties composing the Late Winter antlerless hunting zone for 2018/2019 will be available around 1 Oct at: www.dnr.illinois.gov/hunting.

During the 2017/2018 hunting season, 24 counties were open for the Late Winter Deer Season and 15 northern Illinois counties were open to CWD Deer Season. Even though the seasons are held concurrently, and all harvest in each is reported electronically, different regulations may apply for the two seasons. See FAQs hereafter regarding both seasons.

Permit and Application Information
• Resident Late Winter County Deer Permits will be available for sale over-the-counter from license vendors beginning 12 Dec 2018 through the last day of Late Winter Deer season.
• Illinois resident hunters must have a current, valid Late Winter Deer Season Permit, or an unfilled firearm, youth, muzzleloader or property-only landowner/tenant firearm deer permit valid for the previous firearm, youth or muzzleloader deer season and valid for one of the open counties.
• Nonresident hunters must have an unfilled firearm or muzzleloader deer permit valid for the previous youth, firearm or muzzleloader deer season and valid for one of the open counties.
• Unfilled firearm, youth or muzzleloader deer permits are valid only for the county for which they were originally issued, except that unfilled landowner property-only hunting firearm deer permits are valid only on lands owned/leased by the permit holder within the open counties.
• Unfilled firearm, youth or muzzleloader deer permits that were originally issued for special hunt areas are not valid during the Late Winter Deer Season unless the hunter is redrawn to hunt at the special site with a county permit without conducting a lottery.
• Persons using an unfilled firearm, youth or muzzleloader deer permit valid for the previous firearm, youth or muzzleloader deer season (including landowner permits) may harvest only antlerless deer even when using an either-sex permit.

Legal Firearms
Hunters using:
• Unfilled Firearm Deer Season or Late Winter Deer Season permits may use all firearms described in Firearm and Muzzleloader Deer Hunting above, as well as single-shot muzzleloading handguns (blackpowder handguns incapable of being loaded from the breech end) of .50 caliber or larger capable of producing at least 500 foot pounds of energy at the muzzle according to published ballistic tables of the manufacturer. Single-shot muzzleloading handguns must use a projectile of .44 caliber or larger with sufficient blackpowder or “blackpowder substitute” (such as Pyrodex) to produce at least 500 foot pounds of energy at the muzzle. A wad or sleeve is not considered a projectile or part of a projectile.
• Unfilled Muzzleloader Deer Season permits may use only muzzleloading rifles.
• Unfilled Youth permits may use only shotguns or muzzleloaders.
CHRONIC WASTING DISEASE (CWD) IN ILLINOIS

Neurological disease of deer • All deer are susceptible • CWD is always fatal • There is no treatment or cure

If CWD is not controlled:
• This disease will likely spread over large portions of the state.
• Infection rates are expected to increase to high levels.
• Deer populations will likely be reduced if not eliminated by this disease.

CWD is transmitted by:
- Direct contact with an infected deer.
- Ingestion of residual body fluids from a sick deer shed into the environment.

Reducing deer populations within 2 miles of where CWD has been found has kept infection levels low and minimized spread.

Lower deer density = less CWD risk

Additional Deer Seasons
Additional deer seasons were established with low cost permits in CWD counties. Hunters are encouraged to harvest as many deer as possible in CWD areas and have them tested. Samples provided by hunters contribute toward disease management goals.

Testing is free and available at:
- Check stations in CWD counties during firearm deer season.
- Select processors, taxidermists and drop-off stations statewide and during all seasons.
- List is available at www.dnr.illinois.gov/programs/CWD/Documents/CWDSamplingLocations.pdf

Minimize Spread Through Proper Carcass Disposal
Carcass parts (especially the head and spinal column) can carry CWD agents
- Carcass parts should be buried under 6" of soil or landfilled.
- This is critical for deer harvested in CWD areas and moved to other parts of the state.

Cull Additional Deer
Where needed, IDNR staff will cull additional deer:
- Only on land with permission of owner in close proximity to known infection.
- After hunting seasons are completed.
Suitable venison is returned to landowners or donated to local food pantry network.

Health Concerns
CWD is not known to be a threat to human health, livestock or pets, but recent research is raising the level of concern. Health authorities recommend that:
- Deer should be tested, especially when harvested from known CWD areas.
- Deer should be handled and processed in a way to minimize exposure to CWD causing agents.
- No part of any CWD positive animal should be consumed by humans or other animals.

Additional information
Additional information about CWD in Illinois is available at www.dnr.illinois.gov/programs/CWD/Pages/default.aspx.

IDNR is responsible for proper management and conservation of deer, with an eye toward long term benefit and sustainability. In CWD affected areas, hunters and managers are being asked to sacrifice some deer abundance today to ensure the prosperity of deer resources statewide in the future.
Youth Deer Hunting

- Only young hunters (resident or non-resident) who have not reached their 18th birthday before the first day of the hunt may participate in the Youth Deer Hunt. Unfilled Youth Permits are also valid during the first weekend of Firearm Deer Season.
- Participants must have a current, valid Youth Deer Hunt Permit.
- Each youth must be accompanied by a supervising, non-hunting adult. Supervising adult may hunt during the 1st segment of firearm season with valid firearm permit while accompanying a Youth Deer Season permitted hunter.
- Permits will be available for sale over-the-counter from license vendors beginning 1 August through the last day of the youth deer season in October.
- Hunters may purchase only a single permit (either-sex) for one of the open counties.
- All counties except Cook, DuPage and Lake counties, and that portion of Kane County east of State Route 47, are open to youth deer hunting.
- Legal firearms are limited to shotguns, handguns and muzzleloading rifles during the youth firearm deer hunting season.

Site-specific Youth Deer Hunts: (hunters age 17 or younger)
- Lake Le-Aqua-Na SP: Hunting occurs 16-18 Nov 2018. Site permit required (contact site directly).
- Fort Massac SP and Crab Orchard NWR
- Unfilled Youth Deer Permits are not valid for hunting during the first firearm season on public land sites that limit the number of hunters during the firearm season using the site-specific lottery permit system. But, public sites that allow unrestricted access with no lottery permits may be hunted.

Disabled Hunter Deer Hunts: (qualified disabled persons only)
- Clinton Lake SRA; Horseshoe Lake; Johnson-Sauk; Lost Mound Unit FL; Rend Lake WMA (U.S. Army Corps of Engineers); Rock Cut SP; Spoon River; Starved Rock SP, Wayne Fitzgerald; Wolf Creek SP/Shelbyville FL (U.S. Army Corps of Engineers)
- Physically Challenged Archery Deer Hunt: Kankakee River SP
- Additional deer hunt locations for disabled individuals may be available. Contact IDNR Disabled Outdoor Opportunities Coordinator Jay Williams at jay.d.williams@illinois.gov for further details.

Integrated Hunting Opportunities

Deer Hunting FAQs

Can I use mechanical deer decoys or electronic calls for deer hunting?
A: Yes. (Note: electronic turkey decoys and electronic calls are illegal for turkey hunting).

Which counties are open for hunting during the Late Winter antlerless and the CWD deer seasons?
A: IDNR will announce in October the counties open to the Late Winter antlerless deer season. Hunters should watch for news releases or check www.dnr.illinois.gov. Counties open to the Special CWD deer season are Boone, Carroll, Grundy, Jo Daviess, Kankakee, Kendall, LaSalle, Livingston, McHenry, Ogle, Stephenson, Will and Winnebago counties, and the portion of Kane County west of State Route 47. Additional counties

Can I kill an antlered deer during the Late Winter antlerless or the Special CWD deer seasons?
A: Hunters hunting in counties open for the Late Winter antlerless deer season are limited to shooting “antlerless deer only,” regardless of the type of firearm permit held by the hunter. Hunters hunting in counties open to the Special CWD deer season may harvest an antlered deer if they have a leftover unused either-sex permit from the current year Firearm, Muzzleloader-only or Youth Seasons; but hunters may only harvest an antlered deer when utilizing the Special CWD antlerless permit.

How many deer can I harvest during the Late Winter Antlerless or the Special CWD deer seasons?
A: Hunters hunting during the Late Winter Antlerless season may harvest one “antlerless” deer per Late Winter Antlerless deer permit. Hunters also may fill any unused leftover current year Firearm, Muzzleloader-only, Landowner Firearm or Resident Youth firearm deer permits provided they were issued for an open county. Leftover permits may be used to harvest “antlerless deer only,” regardless of whether the permit is stamped “antlerless” or “either-sex.” Late Winter Antlerless deer hunters must use the weapon specified on the permit.

Hunters hunting in open counties of the Special CWD deer season may only harvest one “antlerless” deer per CWD firearm deer permit, and also can use any unused leftover current year firearm permits, as above. Hunters in the CWD counties also can harvest an antlered deer if they have an unfilled “either-sex” left over permit from the regular Firearm, Muzzleloader-only or the Youth firearm deer seasons issued for an open CWD season county.

Can I archery deer hunt during the Late Winter Antlerless and the Special CWD deer seasons, and if so, do I have to wear orange clothing?
A: Yes. Even though archery season is closed during the regular firearm season, archery season is still open during the Youth, Muzzleloader-only, Late Winter Antlerless and the Special CWD deer seasons. If you are archery hunting in a county open to one of the firearm deer seasons, you must wear a solid blaze orange or solid blaze pink hat and a solid blaze orange or solid blaze pink outer upper garment of at least 400 square inches.

If I am archery deer hunting during the days when the Late Winter Antlerless or the Special CWD deer seasons are open, can I shoot an antlered deer?
A: Yes. Archers are subject to the Archery season regulations, so you may shoot an antlered deer with a bow when archery deer hunting concurrently with the Late Winter Antlerless or the Special CWD deer seasons if you possess a valid Either-Sex Archery deer permit and if you have not previously reached the limit of two antlered deer.

Can I firearm deer hunt and archery hunt at the same time during the Late Winter Antlerless or the Special CWD deer seasons or use a bow to fill a firearm deer permit?
A: No, the law specifically states that archery hunters cannot be in possession of a firearm while archery deer or turkey hunting. You cannot legally possess a bow and firearm at the same time while deer hunting regardless of what permits you have and what seasons are open.

</table>

**DATES ADDITIONAL SEASON (inclusive)**

**HOURS LIMIT REGULATIONS**
To hunt turkey, residents and non-residents will need a base hunting license, one of the habitat stamps and at least one turkey permit listed below. Exemptions to these requirements are specified in table. For residency qualification, see Resident definition in the Statewide Regulations section.

Licenses/Stamps/Permits available to residents and/or non-residents are listed with an associated fee.

See turkey hunting maps for associated spring and fall zones.

It is unlawful to:

- Hunt wild turkey without first obtaining an IDNR permit.
- Hunt wild turkey unless the permit is signed and is in the hunter’s possession while hunting.
- Harvest in Illinois, or have in possession, more than one wild turkey per legally authorized permit.
- Leave in the field or transport a wild turkey without first immediately attaching the leg tag securely around the leg as instructed on the permit. Note: Leg tag must be affixed to the wild turkey immediately upon kill. The leg tag must remain attached to the leg of the turkey until it is at the legal residence of the person who legally took or possessed the turkey and the turkey has been checked in.
- Not leave the turkey whole (or field dressed) until it has been checked in.
- Possess, while in the field during wild turkey seasons, any wild turkey permit issued to another person.
- Hunt wild turkey in a county or area other than specified on the permit.

Spring Turkey Zones:
North Zone includes that portion of Illinois north of Crawford, Jasper, Effingham, Fayette, Bond and Madison counties. South Zone includes the remainder of the state.

Fall Firearm Turkey Zone:
Counties shaded in gray are those open to fall firearm turkey hunting.

Firearm and Archery Equipment Regulations

- The only firearm that can be used to hunt wild turkey is a shotgun (20 gauge to 10 gauge only, no .410 or 28 gauge allowed). You may not possess any other type of firearm for the purpose of hunting wild turkey.
- No. 4 shot is the largest shot that may be used while hunting turkey with a shotgun.
- Legal vertical bow types are long, recurved or compound bows with a minimum pull of 30 pounds at some point within a 28-inch draw. Minimum arrow length for all vertical bow types is 20 inches (not including point).
- To use a crossbow it must have a minimum draw weight of 125 pounds; minimum overall length of 24 inches; a working safety; and used with fletched bolts or arrows of not less than 14 inches (not including point).
- Broadheads must be used for archery turkey hunting. Broadheads may have fixed (must be metal or flint-, chert or obsidian-knapped) or expandable (must be metal) cutting surfaces, but they must have a minimum 7/8 inch diameter when fully opened.
- It is unlawful to have any firearm in possession while hunting turkey with any type of bow and arrow (but see Statewide Regulations on concealed carry handguns).

Mandatory Turkey Harvest Reporting

Successful hunters must register their harvest by the designated time on the same calendar day the turkey was harvested by calling toll-free 1-866-452-4325 (1-866-ILCHECK) or by accessing the online check-in system at www.dnr.illinois.gov/hunting. See separate Spring and Fall Wild Turkey Hunting Information sections below for more specific requirements. Hunters must provide all information requested by the telephone check-in system and will be provided with a confirmation number to verify that they checked in their harvest. The confirmation number must be written by the hunter onto the leg tag.

Windshield Cards For Public Land Hunting/Trapping

Free “Windshield Cards” are required to hunt turkey and record hunting effort/harvest at many Illinois Public Hunting Areas. Cards are available at: https://dnr.illinois.gov/windshieldcard/index.asp. Print a card for each site you intend to hunt and place on the dashboard of your vehicle when hunting the site. Each hunter will need to display a windshield card. For information or assistance, contact the site where you intend to hunt. Hunters are required to return to this website prior to Feb. 15 each year to record harvest information.

HUNTING PERMIT PROCESS

- Apply online at https://www.dnr.illinois.gov/hunting/Pages/TurkeyHunting.aspx or with a hardcopy application. To receive hardcopy applications for a wild turkey hunting permit, contact the Springfield Permit Office at (217) 782-7305. See sections on the permit application process for spring and fall hereafter.
- Applicants please allow approximately 4 weeks after the respective application deadline dates for Lottery Drawing results.

Decoys and Other Attractants

It is unlawful to:
- use live or electronic decoys, dogs or recorded calls.
- possess or use any net or trap for harvesting turkeys.
- harvest wild turkeys by the use or aid of bait or baiting of any kind. “Bait” means any material, whether liquid or solid, including food, salt, minerals and other products that can be ingested, placed or scattered in such a manner as to attract or lure wild turkeys. “Baiting” means the placement or scattering of bait to attract wild turkeys.

For the purposes of taking wild turkeys, nothing in this section shall be construed to prevent the manipulation, including mowing or cutting, of standing crops as a normal agricultural or soil stabilization practice, food plots, or normal agricultural practices, including planting, harvesting, and maintenance, such as cultivating, or the use of products designed for scent only and not capable of ingestion, solid or liquid, placed or scattered, in such a manner as to attract or lure wild turkeys.

Turkey Hunting Season Information (Additional to Statewide Regulations)

Spring Season Regulations

Turkeys Legal to Harvest
• Only toms and jakes (males) or a hen with a visible beard are legal to harvest during the spring season.

Clothing Requirements
• Hunters may wear all camouflage clothing during the spring turkey season. No blaze orange or blaze pink clothing is required, but hunters are encouraged to wear at least a blaze orange or blaze pink hat or vest when not actively hunting to maximize visibility to other hunters.

Spring Permit Application Process
• **First Lottery**: Only residents may apply for one turkey hunting permit. This excludes applicants who have received or will receive a landowner property-only hunting permit for the spring season.
• **Second Lottery**: Residents who were rejected for a wild turkey permit during the first lottery, who are applying for their first permit, or non-residents may apply for one permit. Eligible Illinois residents have preference over non-residents in this lottery. This excludes applicants who have received or will receive a landowner property-only hunting permit for the spring season.
• **Third Lottery**: Residents or non-residents with fewer than two permits may apply for one permit. Illinois residents have preference over non-residents in this lottery.
• **Over-the-Counter Sales Period**: Permits remaining after the Third Lottery Drawing will be available over-the-counter from license vendors throughout the state on a first-come, first-served basis. Permits will be sold until quotas are exhausted, or until the close of the specific turkey season segment for which the permit is being requested. Persons may purchase one or more permits during this period, subject to availability, except that no one may exceed the limit of three permits in total for spring turkey hunting, including youth and landowner permits.
• **Permit Limit**: Three wild turkey hunting permits may be obtained for the spring season using either shotgun, archery or combination of both, subject to availability.

Turkey Calling Prior to Season
*It is unlawful to use a turkey call that imitates sounds made by a turkey, or to attempt to call a turkey by making these sounds, while in the field in the Southern Zone from 15 March through the day before turkey season, and in the Northern Zone from 22 March through the day before turkey season. This prohibition applies only in counties open to spring turkey hunting and does not apply to hunters while participating in the Youth Turkey Season. Note: This does not prohibit the use of locator calls that imitate other species such as owls, crows, hawks, etc.

Shooting Turkeys in Trees
*It is unlawful to shoot a wild turkey while it is in a tree before 7 a.m.

Mandatory Harvest Reporting
Turkeys harvested during the spring hunting season must be checked in by 3 p.m. the day of harvest.

Non-Hunting Activities During Spring Seasons
At IDNR sites offering spring wild turkey hunting, mushroom hunting and other non-hunting activities are prohibited during legal shooting hours for wild turkey hunting (1/2 hour before sunrise to 1 p.m.).

Fall Season Regulations

Turkeys Legal to Harvest
• Of any sex are legal to harvest during the fall gun and fall archery seasons.

Fall Gun and Archery Season Regulations

Clothing Requirements
• No special clothing requirements, but hunters are encouraged to wear at least a blaze orange or blaze pink hat or vest when not actively hunting to maximize visibility to other hunters.

Turkeys Legal to Harvest
• Of any sex are legal to harvest during the fall gun and fall archery seasons.

Fall Gun Permit Application Process
• **First Lottery**: Residents may apply for one turkey hunting permit. This excludes applicants who have received or will receive a landowner property-only hunting permit for the fall gun season.
• **Second Lottery**: Residents who were rejected for a wild turkey permit during the first lottery, who are applying for their first permit, or non-residents may apply for one permit. Eligible Illinois residents have preference over non-residents in this lottery. This excludes applicants who have received or will receive a landowner property-only hunting permit for the fall gun season.
• **Third Lottery**: Residents or non-residents with fewer than two permits may apply for one permit. Illinois residents have preference over non-residents in this lottery.

Fall Gun Permit
Limit of two wild turkey hunting permits may be obtained for the fall gun season, subject to availability.

Archery Permit Application Process and Limit
Fall archery permits do not require lottery drawing and are available over-the-counter from license vendors only. Two wild turkey hunting permits may be obtained for the fall season.

Shooting Turkeys in Trees
*It is unlawful to shoot a wild turkey while it is in a tree before 7 a.m.

Mandatory Harvest Reporting
Turkeys harvested during the fall gun or fall archery hunting season must be checked in by 10 p.m. the day of harvest.

Due to recent changes in the U.S. Fish and Wildlife Service’s regulatory process for migratory bird hunting, state agencies can now provide season date and bag limit information to hunters earlier. Improving the clarity and accessibility of hunting regulations and information is a top priority for the IDNR. Therefore, Waterfowl Hunting was added in the regular hunting and trapping digest this year to provide hunters with one document containing all the regulations and information they need to hunt all species in Illinois. There will not be a separate waterfowl digest this year. A detailed account of the new process for setting annual waterfowl hunting regulations is available at: [https://www.fws.gov/birds/policies-and-regulations/regulations/how-regulations-are-set-the-process.php](https://www.fws.gov/birds/policies-and-regulations/regulations/how-regulations-are-set-the-process.php)

**Waterfowl Hunting Zone Descriptions**

**North Duck Zone**: That portion of the state north of a line extending west from the Indiana border along Peotone-Beecher Road to Illinois Route 50, south along Illinois Route 50 to Wilmington-Peotone Road, west along Wilmington-Peotone Road to Illinois Route 53, north along Illinois Route 53 to New River Road, northwest along New River Road to Interstate Highway 55, south along I-55 to Pine Bluff-Lorenzo Road, west along Pine Bluff-Lorenzo Road to Illinois Route 47, north along Illinois Route 47 to I-80, west along I-80 to I-39, south along Illinois Route 18, west along Illinois Route 18 to Illinois Route 29, south along Illinois Route 29 to Illinois Route 17, west along Illinois Route 17 to the Mississippi River, and due south across the Mississippi River to the Iowa border.

**Central Duck Zone**: That portion of the state south of the North Duck Zone line to a line extending west from the Indiana border along I-70 to Illinois Route 4, south along Illinois Route 4 to Illinois Route 161, west along Illinois Route 161 to Illinois Route 158, south and west along Illinois Route 158 to Illinois Route 159, south along Illinois Route 159 to Illinois Route 3, south along Illinois Route 3 to St. Leo's Road, south along St. Leo’s road to Modoc Road, west along Modoc Road to Modoc Ferry Road, southwest along Modoc Ferry Road to Levee Road, southeast along Levee Road to County Route 12 (Modoc Ferry entrance Road), south along County Route 12 to the Modoc Ferry route and southwest on the Modoc Ferry route across the Mississippi River to the Missouri border.

**South Duck Zone**: That portion of the state south and east of a line extending west from the Indiana border along Interstate 70, south along U.S. Highway 45, to Illinois Route 13, west along Illinois Route 13 to Greenbriar Road, north on Greenbriar Road to Sycamore Road, west on Sycamore Road to N. Reed Station Road, south on N. Reed Station Road to Illinois Route 13, west along Illinois Route 13 to Illinois Route 127, south along Illinois Route 127 to State Forest Road (1025 N), west along State Forest Road to Illinois Route 3, north along Illinois Route 3 to the south bank of the Big Muddy River, west along the south bank of the Big Muddy River to the Mississippi River, west across the Mississippi River to the Missouri border.

**Southcentral Duck Zone**: The remainder of the state between the south border of the Central Zone and the North border of the South Zone.

**Geese North Goose Zone**: That portion of the state north of a line extending west from the Indiana border along Interstate 80 to I-39, south along I-39 to Illinois Route 18, west along Illinois Route 18 to Illinois Route 29, south along Illinois Route 29 to Illinois Route 17, west along Illinois Route 17 to the Mississippi River, and due south across the Mississippi River to the Iowa border.

**Central Goose Zone**: That portion of the state south of the North Goose Zone line to a line extending west from the Indiana border along I-70 to Illinois Route 4, south along Illinois Route 4 to Illinois Route 161, west along Illinois Route 161 to Illinois Route 158, south and west along Illinois Route 158 to Illinois Route 159, south along Illinois Route 159 to Illinois Route 3, south along Illinois Route 3 to St. Leo’s Road, south along St. Leo’s road to Modoc Road, west along Modoc Road to Modoc Ferry Road, southwest along Modoc Ferry Road to Levee Road, southeast along Levee Road to County Route 12 (Modoc Ferry entrance Road), south along County Route 12 to the Modoc Ferry route and southwest on the Modoc Ferry route across the Mississippi River to the Missouri border.

**South Goose Zone**: Same zones as for ducks.

**South-central Goose Zone**: Same zones as for ducks.

**Hunting credentials and requirements**

- To hunt migratory waterfowl, residents and non-residents will need a base hunting license, State Waterfowl Stamp, Federal Waterfowl Stamp and HIP Certification hereafter. Exemptions to these requirements are specified in table. For residency qualification, see Resident definition in Statewide Regulations (page 5).
- Licenses/Permits/Stamps available to residents and/or non-residents are listed with an associated fee.
- See waterfowl hunting maps for associated zones.

### Federal Migratory Bird Hunting & Conservation Stamp

Each year waterfowl hunters purchase Migratory Waterfowl Stamps, or “duck stamps” as a requirement to hunt migratory waterfowl. Authorization for a federal duck stamp came in 1934 from passage of the Migratory Bird Hunting Stamp Act, which was largely driven by waterfowl hunters’ concern over habitat loss and declining waterfowl populations. Funds from the purchase of these stamps are directed towards the purchase or lease of lands for inclusion in the National Wildlife Refuge System, providing critical breeding, migration and wintering habitat for waterfowl and a variety of other species, and recreation opportunity in many areas. With an initial cost of $1 and current cost of $25, Federal Duck Stamp funds to date have totaled over $800 million to protect more than 5.7 million acres of wildlife habitat nationwide.

### State Migratory Waterfowl Stamp

Similar to the federal duck stamp, Illinois hunters initiated the Illinois Migratory Waterfowl Stamp Fund, which was established in 1975. The stamps originally cost $5, increasing to $15.50 in 2011. Over the life of the fund, stamp purchases have led to over $24 million deposited in this fund, with current average sales of about 60,000 stamps annually, leading to nearly $1 million annual revenue. Physical paper Illinois stamps affixed to hunters’ licenses were discontinued in 2011 and now only appear as a line item on printed licenses. Half of the funds generated annually are used within Illinois to manage, maintain and acquire waterfowl and wetland habitat and hunting areas. The remaining funds are used to conserve critical grassland and wetland habitat on the Canadian breeding grounds, where many of the ducks that visit Illinois and the Mississippi Flyway originate.

### HIP Registration

Free registration with HIP (National Migratory Bird Harvest Information Program) is required by law every year to hunt migratory game birds. Any licensed hunter who plans to hunt any species of migratory game bird must register with HIP before hunting. Get your HIP certification when purchasing your hunting or sportsman license or register for HIP by calling 1-888-6PERMIT (record the transaction number on your license). Lifetime license holders also need to register with HIP on an annual basis. HIP is a nationwide program and you must register separately in every state where you hunt waterfowl, coots, doves, rails, snipe, woodcock and other migratory game birds [https://www.fws.gov/birds/surveys-and-data/harvest-surveys/harvest-information-program.php](https://www.fws.gov/birds/surveys-and-data/harvest-surveys/harvest-information-program.php). Cooperation and support from hunters make sound resource management possible.

### Public Land Hunting Windshield Cards

Free Public Site Hunting Windshield Cards are required to hunt waterfowl at many Illinois Public Hunting Areas. Cards are available at [https://dnr.illinois.gov/windshieldcard/index.asp](https://dnr.illinois.gov/windshieldcard/index.asp). For sites that require windshield cards, print a card for each site you intend to hunt and place on the dashboard of your vehicle when hunting the site. Each hunter will need to display a windshield card. For information or assistance, contact the site where you intend to hunt.

For most species, hunters are required to return to this website prior to Feb. 15 each year to record harvest information.

### Waterfowl Bands

The U.S. Geological Survey’s Bird Banding Laboratory maintains a website for reporting all migratory bird bands, including waterfowl. If you harvest a banded bird, please visit [www.reportband.gov](http://www.reportband.gov) and provide information about when and where you shot the bird. The 1-800 call-in number is no longer available for reporting bird bands. The phone number will direct you to the [www.reportband.gov](http://www.reportband.gov) website. All federal bird bands, even those without a web address printed on them, can be reported online. Old bands with numbers worn off may still be reported by emailing: bandreports@usgs.gov for instructions. The band may need to be sent in, but the process does not destroy the band, and it will be returned to you. Band reporters will be emailed a Certificate of Appreciation with information about when and where the band was banded. Your cooperation on reporting band numbers gives waterfowl biologists a wealth of information useful in managing the resource to provide hunters with maximum recreational opportunities while protecting waterfowl populations.

### Site-Specific Hunting Permits

Waterfowl hunting permits for specific dates on several IDNR sites are available through a lottery system. Applications from Illinois residents only will be accepted for inclusion in the first lottery. A second lottery will be held for unsuccessful first lottery applicants, non-residents or anyone who did not apply in the first lottery. A third lottery will be held for applicants to receive either a first and/or second permit. Additional permits, up to five total, may be obtained from unfilled quotas on a first-come, first-served basis ending 72 hours prior to the hunt date by visiting [https://www.dnr.illinois.gov/hunting/Pages/WaterfowlHunting.aspx](https://www.dnr.illinois.gov/hunting/Pages/WaterfowlHunting.aspx) beginning Oct. 1.

Other Hunting Opportunities

Public waterfowl hunting opportunities exist at over 100 sites in Illinois covering a broad range of access and management. Please see the regional site maps at the end of this digest for sites offering waterfowl hunting. Check Hunter Fact Sheets or call sites directly for details on hunting opportunities and regulations.

Waterfowl Hunting Outlook

See the IDNR Waterfowl Hunting website here: https://www.dnr.illinois.gov/hunting/Pages/WaterfowlHunting.aspx

Waterfowl and Wetland Management

See the IDNR Waterfowl Hunting website here: https://www.dnr.illinois.gov/hunting/Pages/WaterfowlHunting.aspx

Migratory Waterfowl Regulations

The following state and/or federal rules apply to the taking, possessing, shipping, transporting and storing of migratory birds. This material is only a summary and hunters also should consult Title 50, Code of Federal Regulations, Part 20 http://www.ecfr.gov, and Chapter 520 of the Illinois Compiled Statutes, or talk with a Conservation Police Officer.

TOM ROSTER’S 2016 NONTOXIC SHOT LETHALITY TABLE

Proven Nontoxic Loads For Waterfowl, Doves, & Upland Game Birds

Vel. Range Tested: 1,225 – 1,700 FPS

ACTIVITY

| Proven Nontoxic Loads For Waterfowl, Doves, & Upland Game Birds | Observed: Hunting'1 Yearly Shooting Range During Activity (Yards) | Most Effective Nontoxic Shot Size(s) Listed Under ACTIVITY At The Distances Listed in the Second Column | Minimum Lead Weight (Grains) | Minimum Pellet Sits Needed on Vital Areas for Clean Kill (at 15 yd) | Minimum Count Needed at Any Distance for Clean Kill (at 30 yd) | Minimum Pattern Chokes (at Distance in Lead Shot Choke Designations) | Most Effective Chokes (at Lead Shot Choke Designations) | Pellets of 30/36 DPH hardness. The HEVI-Shot pellets were of 13.9 gic density and are harder than traditional steel pellets.

Large Geese At Long Range

| Giant, Western, Atlantic and Interior Canadas | 50-65 | Steel BBB to T HEVI-Shot 2 to B | 1-1/4 | 1-2 | 50-55 | Improved Modified | Improved Modified, Full |
| Small Geese Over Decoys | 50-65 | Steel BB to BBB HEVI-Shot 2 to B | 1-1/2 | 1-2 | 50-55 | Improved Cylinder, Modified |
| Medium/Small Geese | 60-65 | Steel BB to BBB HEVI-Shot 2 to B | 1-1/2 | 1-2 | 60-65 | Improved Modified |
| Medium/Small Geese Over Decoys | 65-85 | Steel 2 to BB HEVI-Shot 4 to 2 | 1-1/4 | 1-2 | 60-65 | Improved Cylinder, Modified |
| Large Ducks At Long Range | 45-65 | Steel 2 to 1 HEVI-Shot 4 | 1-1/8 | 1-2 | 85-90 | Improved Modified, Full |
| Mallard, Black, Pintail, Goldeneye, Gadwall | 45-65 | Steel 2 to 1 HEVI-Shot 4 | 1-1/8 | 1-2 | 85-90 | Improved Modified, Full |
| Large Ducks Over Decoys | 20-45 | Steel 6 to 2 HEVI-Shot 6 to 4 | 1/2 | 1 | 85-90 | Improved Modified, Full |
| Medium Ducks Over Decoys | 20-45 | Steel 6 to 3 HEVI-Shot 6 to 4 | 1/2 | 1 | 85-90 | Improved Modified, Full |
| Small Ducks Over Decoys | 20-45 | Steel 6 to 4 HEVI-Shot 6 to 4 | 1/2 | 1 | 85-90 | Improved Modified, Full |
| Ring-Necked Pheasants | 20-50 | Steel 3 to 2 HEVI-Shot 6 to 4 | 1 | 2-3 | 90-95 | Improved Modified, Full |
| Turkeys (Head and Neck Shots) | 20-40 | Steel 4; HEVI-Shot 6 | 1 | 2-3 | 90-95 | Improved Modified, Full |
| Mournning Doves | 20-45 | Steel 8 to 7 HEVI-Shot 7 1/2 | 1/2 | 1-2 | 200-210 | Improved Modified, Full |
| Northern Bobwhite Quail | 20-30 | Steel 8 to 7 HEVI-Shot 7 1/2 | 1/2 | 1-2 | 200-210 | Improved Modified, Full |
| Swatter Load For Wounded Birds | 20-30 | Steel 7 to 6 | 1 | 1 | 175 | Improved Modified, Full |

This table summarizes Tom Roster’s analyses to date of the lethality data bases for certain of the 16 U.S. steel vs lead waterfowl & dove shooting tests published between 1988 & 2014 & one steel-only pheasant shooting test (1998) plus lethality data bases owned by ammunition companies for birds taken with nontoxic shotshell loads. Roster is the most accurate, full, and complete source of information on the subject. He is the only one who has compared all lead vs steel shotshell loads.

DU EVENTS: MAKING THE OFF-SEASON ENDURABLE SINCE 1937

By attending your local event, you can have a great time while supporting our mission of waterfowl and wetland conservation. To date, Ducks Unlimited has spent over $21 Million to conserve over 50,000 acres of wetlands in Illinois. And it's all made possible by your generous support. To find an event near you, visit ducks.org/illinois.
Migratory Waterfowl Regulations

The following state and federal rules apply to the taking, possessing, shipping, transporting and storing of migratory birds. This material is only a summary and hunters also should consult Title 50, Code of Federal Regulations, Part 20 [http://www.ecfr.gov], and Chapter 520 of the Illinois Compiled Statutes, or talk with a Conservation Police Officer.

Prohibited Devices and Methods

It is unlawful to:
• use a trap, snare, net, rifle, pistol, swivel gun, shotgun larger than 10 gauge, punt gun, battery gun, machine gun, fishhook, poison, drug, explosive or stupefying substance to harvest waterfowl. Crossbows may be used any time a bow and arrow is a legal means of harvest.
• hunt by driving, rallying or chasing waterfowl with any motorized conveyance or any sailboat to put them in the range of the hunters.
• hunt with a shotgun capable of holding more than three shells, UNLESS it is plugged with a piece of filter which limits total shell capacity to three and which is incapable of removal without disassembling the gun. This does not apply during Conservation Order light goose seasons (snow/blue and Ross’ geese) that occur after Canada goose season has closed.

Non-toxic Shot Requirements for Waterfowl, Snipe and Rail

It is unlawful to have in possession while attempting to harvest waterfowl (including coots and captive-reared mallards), snipe or rail any shotgun shells not approved as non-toxic by federal regulations. Most commercially available shot shells from major manufacturers are approved non-toxic options. A list of non-toxic shot currently approved by the USFWS can be found at: [https://www.fws.gov/birds/bird-enthusiasts/hunting/nontoxic.php](https://www.fws.gov/birds/bird-enthusiasts/hunting/nontoxic.php)
Also see Tom Roster’s Nontoxic Shot Lethality Table© (page 32).

Blinds

It is unlawful to:
• hunt from a floating blind that is not anchored except a scull boat may be used on certain public waters and waterfowl may be harvested from a boat not mechanically powered (see Hunting From Vehicles and Boats in Statewide Regulations) and not camouflaged or disguised.
• hunt waterfowl from a moving watercraft propelled by mechanical power or sails.
• hunt from a sink box (a low floating device, having a depression affording the hunter a means of concealment beneath the surface of the water).

Attractants

It is unlawful to:
• hunt waterfowl with the use or aid of live decoys. All live, tame or captive ducks and geese shall be removed for a period of 10 consecutive days prior to hunting and confined within an enclosure which substantially reduces the audibility of their calls and totally conceals such tame birds from the sight of migratory waterfowl.
• use a recording or electronic calling device to hunt migratory waterfowl. Such electronic calling devices may be used to hunt snow, blue and Ross’ geese during Conservation Order light goose seasons that occur after Canada goose seasons close.

Retrieval of Downed Birds (Wanton Waste)

It is unlawful to:
• fail to retrieve, if possible, and retain in the custody of the hunter in the field, all waterfowl killed or crippled. Note: You need permission to enter private property.
• have or carry an uncased or loaded shotgun in a motorized boat. Waterfowl hunters may have an uncased and unloaded gun in their boats for pursuing crippled waterfowl incapable of normal flight to reduce said bird to possession, provided that the attempt is made immediately upon downing the bird and is done within 400 yards of the blind from which the bird was downed. The gun cannot be loaded unless the motor has been completely shut off and crippled birds may not be shot from the boat until the motor has been completely shut off and the boat’s progress has ceased.
• wantonly waste or destroy the useable meat (defined as the breast meat of a migratory game bird) of any game bird or migratory game bird that has a bag limit, and to leave, dump or abandon a wildlife carcass or its parts along or upon a public right-of-way or highway or on public or private property, including a waterway or stream without permission.

Possession and Tagging

It is unlawful to:
• possess more than one daily limit while in the field or while returning from the field to one’s car, hunting camp, home, etc.
• completely field dress any migratory waterfowl and then transport the birds from the field. The head or one fully-feathered wing must remain attached to all such birds while being transported from the field to one’s home or to a commercial preservation facility.
• give, put or leave any waterfowl at any place other than his/her personal abode, or in the custody of another person, unless the birds are tagged by the hunter with the hunter’s signature and address, the total number of birds involved, by species, and the dates such birds were killed.
• receive or have in custody any waterfowl belonging to another person unless such birds are properly tagged. Tags available at [http://www.dnr.illinois.gov/hunting/waterfowl/Documents/WaterfowlGiftTags.pdf](http://www.dnr.illinois.gov/hunting/waterfowl/Documents/WaterfowlGiftTags.pdf)
• receive, possess or give to another any freshly-killed waterfowl as a gift, except at the personal abode of the donor or donee, unless such birds have a tag attached (see tagging requirements above).
• consider termination of bird possession by the hunter, until the hunter delivers the birds to another person as a gift or to a post office, common carrier or migratory bird preservation facility and consigned for transport by the Postal Service or a common carrier to some person other than the hunter.

Exporting and Importing

It is unlawful to:
• ship migratory waterfowl unless the package is marked on the outside with the name and address of the person sending the birds, the name and address of the person to whom the birds are being sent and the number of birds, by species, contained in the package.
• import migratory waterfowl killed in any foreign country, except Canada, unless such birds are dressed (except one fully-feathered wing must remain attached to all migratory waterfowl being transported between a port of entry and one’s home or to a migratory bird preservation facility), drawn and the head and feet are removed. For information regarding the importation of migratory waterfowl killed in another country, consult 50 CFR 20.61 through 20.66.
• import migratory waterfowl belonging to another person.

Federal Baiting Regulations

It is unlawful to take migratory game birds by the aid of baiting, or on or over any baited area, where a person knows or reasonably should know that the area is or has been baited (see [https://www.fws.gov/le/waterfowl-hunting-and-baiting.html](https://www.fws.gov/le/waterfowl-hunting-and-baiting.html)). However, nothing prohibits:
the taking of any migratory game bird, including waterfowl and coots, on or over the following lands or areas that are not otherwise baited areas—

(i) Standing crops or flooded standing crops (including aquatic); standing, flooded or manipulated natural vegetation; flooded harvested croplands; or lands or areas where seeds or grains have been scattered solely as the result of a normal agricultural planting, harvesting, post-harvest manipulation or normal soil stabilization practice;
(ii) From a blind or other place of concealment camouflaged with natural vegetation;
(iii) From a blind or other place of concealment camouflaged with vegetation from agricultural crops, as long as such camouflage does not result in the exposing, depositing, distributing or scattering of grain or other feed; or
(iv) Standing or flooded standing agricultural crops where grain is inadvertently scattered solely as a result of a hunter entering or exiting a hunting area, placing decoys or retrieving birds.

Hunters MAY:
• hunt ALL legal migratory game birds, including waterfowl and coots.
• hunt over natural vegetation that has been mowed or manipulated in other ways. There is no restriction on when manipulation may occur. In other words, the manipulation may occur before, during or after any season where seeds or grains have been scattered solely as the result of “normal agricultural planting, harvesting, post-harvest manipulation or normal soil stabilization practice,” over surface-mined lands being reclaimed where seeds or grains are scattered solely as a result of a “normal soil stabilization practice.”
• hunt ALL legal migratory game birds over standing crops, standing flooded crops and flooded harvested croplands.
• use natural vegetation to conceal a blind.
WATERFOWL HUNTING

Don’t make a mistake!
All wild swans are protected in Illinois.

Several Midwestern states are reintroducing the native trumpeter swan to the region. Some of these birds are migrating through and wintering in Illinois. You can help bring back this magnificent swan by:

• Learning the difference between swans and snow geese.
• Reporting observations of swans having wing tags, neck collars or leg bands.
• Protecting wetland habitat.
• Reporting any harassment of trumpeter swans.

Trumpeter Swan
Protected Species
Long neck
Length: 4 ft.
Wingspan: 7 ft.
Weight: 20 - 30 lbs.

Caution-
White pelicans have black wing tips, but their wingspan is 8-9 1/2 ft.

Report swan sightings to:
Illinois Department of Natural Resources, Waterfowl Program
700 South 10th Street, Havana, IL 62644
(309) 543-3065

Upland Game Hunting Credentials

License/Permit/Stamps Resident Non-Resident Lottery Online Vendors Phone Paper Application Specifications

Base Hunting License Variable Variable X X X X See Statewide Regulations section for license types.

State Habitat Stamp $5.50 $5.50 X X X Required for all hunters 16 years or older. Not required to hunt hand-reared game birds on licensed game breeding and hunting preserve areas as well as hand-reared pheasants on Department-controlled pheasant hunting areas. Purchasers of a lifetime hunting license prior to 1993 and legally disabled veterans are exempt from this stamp.

Super Senior Habitat Stamp $0.50 $0.50 X X X Available to hunters age 65 and older, but follows exemptions for State Habitat Stamp above.

HIP Certification Free Free X X X Before hunting doves or woodcock, all licensed hunters, including lifetime license holders, must register with HIP. See HIE Registration description hereafter. Disabled individuals, serviceman, and landowners may be exempt from this stamp (see qualification definitions below table).

Upland Game Management Areas Free Free X X See Upland Game Permit Process section for details. Fee may be charged at sites.

Controlled Pheasant Areas Free Free X X

Dove Management Areas Free Free X X

State Land Hunting Opportunities

1) Open hunting on state sites - some IDNR sites do not require a lottery permit to hunt upland game but may require a windshield card or signing in and out when you hunt. Check the Hunter Fact Sheets or call site for hunting opportunities and regulations in your area.

2) Upland Game Permit sites – require a FREE permit issued by a lottery that takes place in August, see Upland Game Permit Process section hereafter.

3) Controlled Pheasant hunting – application period and stand-by hunt info found in the ‘controlled pheasant hunting’ section

4) Additional special hunting opportunities for youth and disabled hunters.

Windshield Cards For Public Land Hunting/Trapping

Free Public Site Hunting Windshield Cards are required to hunt waterfowl at many Illinois Public Hunting Areas. Cards are available at https://dnr.illinois.gov/windshieldcard/index.asp. Print a card for each site you intend to hunt and place on the dashboard of your vehicle when hunting the site. Each hunter will need to display a windshield card. For information or assistance, contact the site where you intend to hunt.

For most species, hunters are required to return to this website prior to Feb. 15 each year to record harvest information.

License Qualification Definitions

1) Disabled individuals are disabled American veterans with at least 10% service-related disabilities or disabled persons certified under the Illinois Identification Card Act as having a Type 1 or Type 4, Class 2 disability.

2) Serviceman are persons on leave from the Armed Services, having entered the military as an Illinois resident

3) Landowner (or tenant) are persons and their children, parents, brothers and sisters permanently residing on their land and hunting on that land.

HIP Registration

Free registration with HIP (National Migratory Bird Harvest Information Program) is required by law every year to hunt mourning doves and woodcock in Illinois. Crow hunting does not require HIP Certification. Get your HIP certification when purchasing your hunting or sportsman license or register for HIP by calling 1-888-6PERMIT (record the transaction number on your license). Lifetime license holders also need to register with HIP on an annual basis. HIP is a nationwide program and you must register separately in every state where you hunt migratory birds. Cooperation and support from hunters make sound resource management possible.

Upland Game zones:
Zones for rooster pheasant, quail, Hungarian partridge are divided by U.S. Route 36 from the Indiana state line to Springfield, Illinois Route 29 from Springfield to Pekin, and Illinois Route 9 from Pekin to Dallas City, then due west to the Mississippi River.

Hunting Credentials and Requirements

• To hunt upland game, residents and non-residents will need a base hunting license and a habitat stamp listed below. Individuals intending to hunt doves or woodcock will also need HIP Certification. Exemptions to these requirements are specified in table. For residency qualification, see Resident definition in Statewide Regulations.

• Individuals wanting to hunt upland birds and/or rabbits on specific IDNR sites may also need to apply for a free Upland Game Permit.

• Licenses/Stamps/Permits available to residents and/or non-residents are listed with an associated fee.

• See upland game hunting map for associated upland bird and rabbit hunting zones.
Upland Game Hunting Regulations (Additional to Statewide Regulations)

Legal Firearm and Archery Equipment
- Upland birds, including migratory species, can be hunted with shotgun or vertical-style bow and arrow (flu-flu arrows only; no broadheads) under regulations outlined in Statewide Regulations.
- Rabbits and squirrels can only be hunted with a gun or bow and arrow (including crossbow), but equipment regulations vary by site.
- Many IDNR sites require non-toxic shot, such as steel, but some do not. Check Hunter Fact Sheets or call site for site-specific regulations.

Clothing Requirements
- A solid blaze orange or solid blaze pink cap/hat and an upper outer garment (including crossbow), but equipment regulations vary by site.
- On non-IDNR land, a solid blaze orange or solid blaze pink hat/cap must be worn to hunt upland birds or rabbits with a firearm.
- Camouflage blaze orange or camouflage blaze pink material does not meet the solid orange or solid pink requirement.
- No blaze orange or blaze pink clothing is required for hunting squirrels, unless simultaneously hunting upland birds or rabbits which requires blaze orange or blaze pink clothing noted above.

Additional Hunting Regulations

You can legally:
- use dogs to hunt upland birds, rabbits and squirrels.
- use all types of non-toxic shot, such as steel and bismuth, at all IDNR sites.
- use stationary or spinning-wing decoys to hunt doves.

You cannot legally:
- use lead shot at many IDNR sites, but some allow lead shot. Check Hunter Fact Sheets or call site for site-specific regulations.
- use a recording or electronic calling device to hunt migratory birds other than crows.
- possess or use any net or trap for harvesting upland birds.
- trap rabbits and squirrels.
- attempt to harvest any other squirrel species beside gray and fox.
- harvest upland birds by the use or aid of bait or baiting of any kind. “Bait” means any material, whether liquid or solid, including food, salt, minerals and other products that can be ingested, placed or scattered in such a manner as to attract or lure upland birds. “Baiting” means the placement or scattering of bait to attract upland birds. For the purposes of harvesting upland birds, nothing in this section shall be construed to prevent the manipulation, including mowing or cutting, of standing crops as a normal agricultural or soil stabilization practice, food plots, or normal agricultural practices, including planting, harvesting, and maintenance, such as cultivating, or the use of products designed for scent only and not capable of ingestion, solid or liquid, placed or scattered, in such a manner as to attract or lure upland birds.
- harvest upland birds, unless they are flying, except for harvesting pheasants that are not flying when crippled and not capable of normal flight and otherwise irretrievable. However, doves, woodcock and crows may be harvested while not in flight.
- remove plumage of pheasants in the field or while being transported to one’s home, taxidermist or food processor.
- transport doves and woodcock unless the head or one fully-feathered wing is attached.

Upland Game Permit Process
- Apply for FREE site-specific upland game and dove hunting permits (see tables p.40 for drawing information and website link and sites offering hunting opportunities. Residents receive application preference.
- Permit holding hunters can bring a number of hunting partners depending on the site but hunting partners cannot hunt without the permit holder being present to hunt.
- Hunting dates depend on each site. Check the Upland Game website or contact site directly for details.
- Tables hereafter show permit application information and a list of IDNR sites with Upland Game or Dove Hunting Permits.

Dove Banding
If you harvest a leg-banded dove, we encourage you to report information about when and where you harvested the bird. You will be mailed a Certificate of Appreciation with information about when and where the dove was banded. Your cooperation on reporting band numbers gives dove biologists a wealth of information useful in managing the resource to provide hunters with maximum recreational opportunities while protecting dove populations. Reporting banded birds will only be available through the internet at: www.reportband.gov

Lead Poisoning in Game Birds
The hazards of lead poisoning in game birds consuming spent shotgun pellets have been well-publicized. Research has determined that doves and other birds also are at risk from acute lead poisoning due to consuming spent shotgun pellets in hunted fields, and that many more doves may be dying each year than waterfowl did prior to the lead shot ban. While non-toxic shot is not required on all hunting areas, upland game hunters are encouraged to use steel or other non-toxic shot types to spare doves and other wildlife from potential lead poisoning. No. 6 or 7 steel shot used with shotgun chokes one size more open than typically used for lead are very effective in harvesting doves. Improved cylinder or skeet is the best choke to use with steel shot for doves. For pheasant, No. 2 or 3 steel will perform like lead No. 4 or 5 lead shot. Even though non-toxic shot is a little more expensive than lead, the cost is justified to help conserve our valuable wildlife resources.

Non-toxic Shot Requirement
- Hunters should be aware that several IDNR sites now require use of non-toxic shot, such as steel.
- For ease of this conversion, note that steel shot #3 is ballistically similar to lead shot #5, and steel shot #6 is ballistically similar to lead shot #7.5 or #8.
- For comparison of shot size and effectiveness, see Tom Roster’s Nontoxic Shot Lethality Table© (page 32).
2019 NATIONAL PHEASANT FEST & QUAIL CLASSIC
Is a celebration of wildlife conservation, bird hunting, dog training, wild game cooking and hundreds of exhibitors. It's the largest upland hunting and conservation event in the world!

SAVE THE DATE: FEBRUARY 22-24, 2019
Join us in Schaumburg, IL. Reserve your room, purchase your event tickets, become an exhibitor and more! Go online to PheasantFest.org today!

THERE'S SOMETHING FOR EVERYONE!
- WILDLIFE HUNTING
- BIRD DOG BONANZA
- YOUTH VILLAGE
- WILD GAME COOKING
- POLLINATOR PLAZA
- HABITAT HELP ROOM

### Upland Game Hunting

- On controlled pheasant hunting areas State Habitat Stamps are not required when hunting captive-reared pheasants. State Habitat Stamps are required when hunting quail, Hungarian partridge and woodcock on controlled pheasant hunting areas where these species can be harvested during the controlled pheasant hunting season.
- Information about controlled pheasant hunting permit reservations is available at: [https://dnr.illinois.gov/controlledhunt/](https://dnr.illinois.gov/controlledhunt/)
- Information about controlled pheasant hunting permit reservations for the public/private partnership areas is available through T. Miller, Inc. at [www.tmillerinc.com](http://www.tmillerinc.com) or (217) 793-6146.
- Thanksgiving Day hunting hours at all controlled pheasant hunting sites are 9 a.m. - 1 p.m.

### 2018 Director’s Hunt

**Hunt Dates: November 19-20, 2018**

**Wayne Fitzgerald State Recreation Area**

UPLAND GAME HUNTING FAQs

How do I check on the status of my Controlled Pheasant Hunting Permit?
A: You may check the status of your Controlled Pheasant Hunting Permit here: https://dnr.illinois.gov/controlledhunt/

Is there a second lottery for leftover permits for the Free Upland Game Permit sites?
A: No, there are rarely any permits leftover.

How do I know if I received a Free Upland Permit?
A: You may check the status of your Free Upland Permit here: http://dnr.illinois.gov/Online-HuntingApplication/UplandGame/searchuplandpermit.aspx

A link to download and print your permit will be provided in your email confirmation.

Youth Opportunity Pheasant Hunts (YOPH) - each young hunter must be accompanied by a non-hunting supervising adult.

Youth Pheasant Hunts

Green River SWA
- YOPH-25 Nov and 29 Dec 2018
- Yes

Eldon Hazlet (Carlyle Lake) SP
- YOPH-25 Nov and 29 Dec 2018
- Yes

Green River SWA
- YOPH-25 Nov and 29 Dec 2018
- Yes

Iroquois Co. SWA
- YOPH-25 Nov and 29 Dec 2018
- Yes

Jim Edgar Panther Creek SFWA
- YOPH-25 Nov and 29 Dec 2018
- Yes

Johnson-Sauk Trail SP
- YOPH-25 Nov and 29 Dec 2018
- Yes

Kankakee River SP
- YOPH-25 Nov and 29 Dec 2018
- Yes

Moraine View SP
- YOPH-25 Nov and 29 Dec 2018
- Yes

Sand Ridge SF
- YOPH-25 Nov and 29 Dec 2018
- Yes

Sangchris Lake SP
- YOPH-10 Nov 2018
- Yes

Wayne Fitzgerald (Rend Lake) SP
- YOPH-10 Nov 2018
- Yes

Horseshoe Lake (Madison Co.)
- IYPH-11 Nov 2018
- Yes

Chain-O-Lakes SP
- IYPH-25 Nov and 29 Dec 2018
- Yes

Horseshoe Lake SP (Madison Co.)
- See www.tmillerinc.com for available dates
- Yes

Ramsay Lake SP
- No

Silver Springs SP
- Yes

Disabled hunters with Standing Vehicle Permits may obtain Controlled Pheasant Hunting Permits for Eldon Hazlet, Des Plaines and Moraine View where special vehicles are available to assist with the hunt. Disabled hunters, as defined by law (520 ILCS 5/2.33), may apply to the IDNR Office of Law Enforcement (217/782-6431) for a Standing Vehicle Permit. Information about controlled pheasant hunting permit reservations for disabled hunters is available at www.dnr.illinois.gov.

What do I do if I was drawn for a permit?
A: A link to download and print your permit will be provided in your email conformation.

Why aren’t there as many pheasant, quail and rabbits as there used to be?
A: Changes in habitat are the primary reasons and includes a decrease in the quantity and quality of habitat. There is less suitable habitat because of changes in the landscape including fewer fencerows, pastures, hayfields, small grains (wheat, oats, etc). Second, the existing habitat quality has decreased because of introduced grasses like fescue and brome that are too thick for upland game.

On some of your Habitat Areas, there is nothing but ‘weeds’, why doesn’t IDNR plant more food plots?
A: Game animals rarely (if ever) starve to death in Illinois. We have ~23 million acres of corn and soybeans in Illinois so wildlife can almost always find waste grain nearby. Annual weeds provide great food and cover for broods and great structure for wildlife.

Is it true that hawks and coyotes are killing all the upland game?
A: While predators do eat some game birds and rabbits, this is not what is causing our long-term decline. If we had adequate habitat (quantity and quality), there would be more game on the landscape.

Why did IDNR add more sites to the list requiring non-toxic shot?
A: Lead shot is highly toxic to most bird species when ingested. Birds do not seem to be able to distinguish small weed seeds from small shot pellets. We are making these changes to reduce the amount of lead being deposited (and subsequently ingested by wildlife) on hunting areas with a high volume of shooting and/or sensitive areas adjacent (e.g. wetlands) to them.

Is there a second lottery for leftover permits for the Free Upland Game Permit sites?
A: No, there are rarely any permits leftover.

General Furbearer Regulations (Additional to Statewide Regulations)

Definitions

Furbearing Mammals: badger, beaver, bobcat, coyote, gray fox, mink, muskrat, opossum, raccoon, red fox, river otter, striped skunk, weasel and woodchuck.

Trap: To capture, or attempt to capture, by setting or placing a leg-hold trap, body-gripping trap, cage or live-trap or other similar device permitted by the Illinois Wildlife Code to capture, hold or kill any protected wildlife.

Water Set: Any trap or similar device that is placed or set in contact with flowing or impounded water.

Land Set: Any trap or similar device not placed or set in contact with flowing or impounded water.

Green Hide: Any hide or pelt which has not been tanned.

Possession of Green Hides

Green hides may be possessed year-round with valid hunting or trapping license.

Possession of Road-kill Furbearers

Furbearing mammals that are found dead or unintentionally killed by a vehicle along a roadway may only be salvaged if the season for that species is open and you possess all appropriate licenses, stamps and permits required to salvage that species. NOTE: Bobcats may only be salvaged by permit holders during the open season. Salvage of weasel, mink, muskrat, beaver, badger and river otter requires a trapping license and state habitat stamp if required; salvage of all other species requires a hunting or trapping license and state habitat stamp if required. Salvaged badgers, bobcats and river otters become part of your harvest limit. River otters and bobcats are subject to registration and tagging requirements.

Possession of Live Furbearsers

Contact IDNR for more specific regulations dealing with possession of live furbearing animals under Chapter 520 5/3.25 of the Wildlife Code.

Furbearing Mammal Breeder Permits

Persons within Illinois who hold, possess or engage in the breeding or raising of live furbearing mammals protected by the Wildlife Code must have a valid Furbearing Mammal Breeder Permit. No permits will be issued for the breeding or raising of striped skunks or coyotes. Furbearing mammal breeders shall keep a record for two years from the date of acquisition, sale or other disposition of each live furbearing mammal or its green hide so raised or propagated (contact IDNR for more specific regulations dealing with possession of live furbearing animals under Chapter 520 5/3.25 of the Wildlife Code).

Trapping and Hunting Credentials and Requirements

- To trap furbearers residents and non-residents will need an appropriate trapping license listed below. Exemptions to these requirements are specified in table. For residency qualification, see Resident definition in Statewide Regulations.
- To hunt furbearers residents and non-residents will need an applicable base hunting license listed below.
- Licenses and Permits available to residents and/or non-residents are listed with an associated fee.
- See bobcat trapping and hunting map for associated zones.

Furbearer zones:
Trapping and Hunting (Badger): Divided by U.S. Route 36.

Bobcat zones:
Bobcats may be harvested in the area indicated by the text and bold boundary line shown on the map above. The southern boundary is defined by U.S. Route 121 dividing Macon County and U.S. Route 36 dividing Douglas County and Edgar County. Remaining boundary follows county lines.

Windshield Cards For Public Land Hunting/Trapping
Free Public Site Hunting Windshield Cards are required to trap and/or hunt furbearers at many Illinois Public Hunting Areas. Cards are available at: https://dnr.illinois.gov/windshieldcard/index.asp. Print a card for each site you intend to hunt and/or trap and place on the dashboard of your vehicle when trapping or hunting the site. Each trapping or hunting the site will need to display a windshield card. For information or assistance, contact the site where you intend to trap and/or hunt.

For most species, hunters are required to return to this website prior to Feb. 15 each year to record harvest information.

Trap Tagging and Checking Requirements
It is unlawful to:
- fail to mark or tag with metal tags or inscribe in lettering the name and address of the owner of the name and customer identification number issued by the Department of Natural Resources, all traps used in the taking of furbearing mammals.
- fail to visit and remove all animals from traps at least once each calendar day.

Trap Size Restrictions
It is unlawful to:
- on land use a leghold trap that has a jaw spread larger than 6 ½ inches or a body-gripping trap that has a jaw spread larger than 7 inches on a side, if square, and 8 inches, if round.
- in water use a leghold trap that has a jaw spread larger than 7 ½ inches or a body-gripping trap that has a jaw spread larger than 10 inches on a side, if square, and 12 inches, if round.
- except during the open season for trapping muskrats, trap beaver or river otter with a leghold trap or one of similar construction having a jaw spread of less than 5 ½ inches or more than 7 ½ inches, or

Spiked and Toothed Jaw Traps
It is unlawful to use any trap with saw-toothed, spiked or toothed jaws.

Deadfalls, Nets and Pit Traps
It is unlawful to use or possess a deadfall, net or pit trap to harvest any protected wildlife.

Snares
It is unlawful to:
- set, use, or maintain a snare unless at least half of the loop is underwater at all times. When set, the snare loop must be 15 inches or less in diameter. Snares must be constructed of cable that is at least 5/64 inch, but no more than 1/8 inch in diameter, and must be equipped with a mechanical lock, anchor swivel and stop device that prevents the snare loop from closing to less than 2 ½ inches in diameter.
- use or possess cable or wire snares constructed of stainless steel metal.

Dens, Nests and Feed Beds
It is unlawful to:
- destroy, disturb or in any manner interfere with dams, lodges, burrows or feed beds of beaver while trapping for beaver or to set a trap inside a muskrat house or beaver lodge.
- set traps closer than 10 feet from any hole or den which may be occupied by a game mammal or furbearing mammal except that this restriction does not apply to water sets. Traps may be legally set within 10 feet of dens in water, but such sets are unlawful on land.

## Repeating or Colony Traps

It is unlawful to trap any furbearing mammal with any colony traps or any cage, box or stove-pipe trap designed to harvest more than one mammal at a single setting. Single catch cage or box traps are legal.

## Closed Trapping Season

It is unlawful to set or place any trap in the field, set or unset, during the closed trapping season. Setting out stakes or floats before the season opens, if no traps are attached to them, is permissible.

## Exposed Bait

It is unlawful to place, set or maintain any leghold trap within 30 feet of bait placed in such a manner or position that is not completely covered and concealed from sight, except that this shall not apply to water sets.

Bait means any bait composed of mammal, bird or fish flesh, fur, hide, entrails or feathers. Leghold traps set on sand may not be placed around exposed bait, such as animal carcasses.

## Beaver, Badger, River Otter, Weasel, Mink and Muskrat — Trapping Only

It is unlawful to harvest beaver, badger, river otter, weasel, mink or muskrat except by trapping. However, beaver, river otter, weasel, mink, and muskrat can be shot with a firearm, pistol, or airgun of a caliber not larger than a .22 long rifle to remove the animal from the trap.

## Rabbits and Squirrels Cannot Be Trapped

It is unlawful to trap any game mammals and birds except furbearing mammals and woodchucks.

## Trapping Near Dwellings

It is unlawful to trap within 100 yards of an inhabited dwelling without first obtaining permission from the owner or tenant.

## Written Authorization to Handle Traps of Another Person

It is unlawful to remove furbearing mammals from, or to move or disturb in any manner, traps owned by another person without written authorization of the owner to do so.

## Permission from Landowner

It is unlawful to trap furbearers on another person’s property without his or her permission. This includes waters flowing over or standing on the land of another person.

## Damaging Property While Trapping

It is unlawful to destroy or damage another person’s property while trapping on his or her land.

## Possession of Green Hides

Green hides may be possessed year-round with valid hunting or trapping license.

---

*www.dnr.illinois.gov*
Every person trapping furbearing mammals must report to IDNR, on supplied forms, all furbearing mammals trapped and sold during the open season. Report forms are normally mailed to a random sample of approximately 20 percent of all licensed trappers. If you do not receive a report form/questionnaire from IDNR after the regular trapping season, you are not required to report your catch.

No more than five otters may be harvested or possessed during the season. Possession limits do not apply to fur buyers, tanners, manufacturers or taxidermists. Possession limits do not apply to tanned pelts, mounted specimens or manufactured products.

Trapping is the only legal method of harvest. Licensed trappers may salvage otters found dead along a roadway during the open season; such animals become part of the person's harvest limit and are subject to permit and tagging requirements.

Trappers must purchase an Otter Registration Permit within 48 hours after harvesting a river otter. The cost of a permit is $5 plus a vendor's fee. Permits are available anywhere you can purchase a hunting or trapping license, including DNR DIRECT. You will be mailed an official CITES pelt tag within 2-3 weeks after purchasing a permit. Otter registration permits must be purchased by the individual who captured the otter and cannot be transferred to another person. NOTE: Do not purchase a permit before you harvest an otter.

An official CITES tag must be permanently affixed to the green hide of each otter (including a whole, un-skinned carcass) before it is exported outside the United States or transferred to a fur buyer, fur tanner, taxidermist or manufacturer (a manufacturer is an individual who dresses and fabricates green hides into fur garments or products). Unsealed CITES tags cannot be transferred to another person. Visit the Department's website at www.dnr.illinois.gov/trapping/Pages/default.aspx for videos about tagging, skinning, fleshing and stretching otter pelts.

*Otter-Methods of Harvest*

*Otter Registration Permit*

*Otter Tagging Requirement*

*Trapper Education Classes Scheduled*

Jubilee College SP is opening youth-only trapping units. A drawing for two youth permits will be held at the site during the regular drawing for trapping permits on DATE. Youth permits will be granted for one year and given exclusive access to trap youth units only. If one or no youth draw the units, the units will be open to all trappers to draw.

Hunters and trappers must possess a Bobcat Hunting and Trapping Permit BEFORE taking or attempting to harvest a bobcat. Applications will be available online only at www.dnr.illinois.gov during 1-30 Sep 2018. Applicants must submit a $5 non-refundable fee. Available permits will be allocated during a lottery and mailed to successful applicants.

- If you receive a Bobcat Hunting and Trapping Permit, you may harvest one bobcat by hunting or trapping or salvage a road-kill during open seasons. Examples of legal methods of hunting include archery, predator calling, stalking, and treeing with dogs. The hunting season for bobcats is closed during firearm deer seasons.
- Taking bobcats is prohibited in the closed zone.
- If you harvest a bobcat, you must purchase a $5 Bobcat Registration Permit at www.dnr.illinois.gov within 48 hours. (Code 306 under “Permits”) The Department will mail you a federal CITES tag within 2-3 weeks. NOTE: Bobcat Registration Permits are not available at license vendors or DNR DIRECT.

A federal CITES tag must be permanently affixed to each bobcat pelt before it is exported from the United States or transferred to a fur buyer, taxidermist, fur tanner, or garment manufacturer. If you plan to have a bobcat mounted, we recommend making a slit between the inner lip and eye hole then placing a piece of wood or plastic in the slit before freezing the bobcat. This will make it easier to insert the federal tag when you receive it.

During July 2015, Western Illinois University (WIU) researchers initiated a multi-year study to estimate bobcat population abundance across west central Illinois in collaboration with the Illinois Department of Natural Resources. Field efforts to capture and radio-collar bobcats were initiated during winter 2016 in Fulton, Hancock, McDonough, and Schuyler counties. Researchers at WIU will continue capturing bobcats during winter 2018, though would benefit from the help of the trapping community across the 4-county area in capturing bobcats. Recolonization of west central Illinois by bobcats is a conservation success story made possible by support of conservation programs by the sportsmen and women throughout Illinois. Your continued support will contribute to an increased understanding of bobcat abundance across west central Illinois, and thus continued hunting and trapping across the region. If interested in ongoing bobcat research across west central Illinois, please contact WIU researcher Chris Jacques (309-298-2155) or Ed Davis (919-548-5196) for additional information.

**Attention Bobcat Trappers**

During the open season, bobcats may be hunted and trapped with the following restrictions:

- No more than five otters or one bobcat may be harvested per season
- No more than five otters or one bobcat may be possessed at any time
- No more than five otters or one bobcat may be possessed at any time
- No more than five otters or one bobcat may be possessed at any time
- No more than five otters or one bobcat may be possessed at any time

During any time when Illinois residents would not be allowed to hunt furbearers or run dogs in Illinois, non-residents are prohibited from hunting furbearers or using or possessing a dog or dogs capable of firing only blank cartridges. When training dogs from sunset to sunrise, no person in, along with or accompanying the dog training party shall be in possession of a firearm or live ammunition, except during authorized field trials or dog training areas.

Blank cartridges are allowed while training dogs during the time when hunting seasons are closed, but only if the dog training party is in possession of a firearm or live ammunition. It is unlawful to possess any firearm or ammunition other than a pistol loaded with blank cartridges while training dogs during the time when hunting seasons are closed.

Competitive hunts licensed by U.K.C., N.K.C., P.K.C. or A.K.C./A.C.H.A. may be held during the 10-day period following the closing date of the raccoon hunting season. Note: Competitive hunts held in the state of Illinois are referred to as "Field Trials," while those held outside of Illinois are referred to as "Company Trials." There is no limit on foxes, coyote, opossum, raccoon, striped skunk or woodchuck.

**Tree Climbing or Cutting Devices**

It is unlawful to use or possess any tree climbing or tree cutting device (i.e., saw or axe) when hunting furbearing mammals, except coyotes.

**Furbearer Running Season**

Furbearers may be pursued or chased with dogs, but not killed, during the running season. The running season for coyote, gray and red fox, opossum, raccoon and striped skunk is open year-round. Coyotes may be hunted only by hunters with valid, unfilled deer permits using the same types of firearms that are allowed for deer. When hunting with a shotgun, make sure that the firearm is unloaded and in a case while in a vehicle or on a conveyance (including but not limited to ATVs and horseback).

It is unlawful to possess any firearm or ammunition other than a pistol loaded with blank cartridges while training dogs during the time when hunting seasons are closed. When training dogs from sunset to sunrise, no person in, along with or accompanying the dog training party shall be in possession of a firearm or live ammunition, except pistols capable of firing only blank cartridges.

Non-residents are prohibited from hunting furbearers or running their dogs in Illinois during any time when Illinois residents would not be allowed to hunt furbearers or run dogs in the non-resident’s state.

**Coyote Hunting**

- Coyotes can be hunted 24 hours a day from 1/2 hour before sunrise on 10 November through midnight on 15 March. During the rest of the year, hunting hours for coyotes are 1/2 hour before sunrise to 1/2 hour after sunset.
- Hunters need a hunting license and habitat stamp unless exempt.
- Coyotes may be hunted on private property using dogs, archery devices, any type and caliber of handgun, any type of legal rifle including large capacity semi-automatic rifles, and shotguns using any type of shell. During firearm deer seasons, coyotes may be harvested only by hunters with valid, unfilled deer permits using the same types of firearms that are allowed for deer. When hunting with a shotgun, make sure that the magazine has been fitted with a plug which makes the shotgun incapable of firing more than three consecutive shots.
- Electronic calling devices are legal for coyote hunting.
- It is legal to use lights with any color of lens to attract coyotes.
- Illinois does not restrict the type of sights or scopes used for coyote hunting (including laser sights and night vision scopes).
- Lights with any color of lens can be used while hunting coyotes as long as the lights are not used from or connected to any vehicle or conveyance (including ATVs and horses).
- It is unlawful for a coyote hunter to wantonly allow a dog to hunt on another person’s land without first obtaining permission of the landowner or tenant. If a hunting dog crosses onto property in which the coyote hunter has no permission to hunt, the hunter has no legal right to follow the dogs. Illinois Animal Control Laws or other local animal control ordinances could apply to dogs running at large.
- Coyote hunters are required to keep their guns unloaded and in a case while in a vehicle or on a conveyance (including but not limited to ATVs and horses) unless exempt by special IDNR permit.
- Guns must remain unloaded until the hunter is clear of the road and right-of-way alongside the road.
- Deer hunters with an unfilled firearm deer permit may hunt coyotes during the first and second firearm deer seasons, but must wear a cap and 400 square inches of solid blaze orange or solid blaze pink outer clothing when hunting.
- Before coyote hunting at public hunting areas, check with the site office for site specific regulations.
- It is legal to hunt coyotes while using or possessing a tree climbing device.

Additional regulations are provided for specific species and dates within the hunting season. The website www.dnr.illinois.gov provides more detailed information on specific regulations for each species and hunting season.
Deer Accidentally Killed/Injured by Motor Vehicles and Methods Other Than Lawful Hunting

To report and claim road-killed deer online, visit: https://www.dnr.illinois.gov/hunting/deer/Pages/Claim-a-Road-Kill.aspx. There is no limit to the number of deer that may be possessed under these circumstances. No part of a deer so killed can be bartered or sold. Except for law enforcement officers in the performance of their duties it is illegal to kill a deer:

• crippled by a collision with a motor vehicle.
• crippled by methods other than lawful hunting unless permission has been obtained from a Conservation Police Officer (see phone numbers on page 1).

The state of Illinois is absolved of any and all liability associated with the handling or utilization of vehicle-killed deer and deer killed by methods other than lawful hunting. Motorists are also reminded to report deer-related traffic accidents to appropriate law enforcement agencies when such reporting is required.

Collision with a motor vehicle

An Illinois resident/driver of a motor vehicle involved in a vehicle-deer collision has priority in legally possessing white-tailed deer killed/injured as a result of a collision with a motor vehicle. If the driver does not take possession of the deer before leaving the collision scene, any citizen of Illinois who is not delinquent in child support may possess and transport the deer. Non-residents may not claim a road-killed deer. Individuals claiming such a deer must report the possession within 24 hours at www.dnr.illinois.gov. Individuals without Internet access can report such possession by calling (217) 782-6431 no later than 4:30 p.m. the next business day.

Killed/injured by methods other than lawful hunting or a vehicle/deer accident

Any individual finding a dead or crippled deer, other than those killed/injured in a vehicle/deer collision or legally harvested by hunting methods, may not transport said deer parts until permission is obtained from a Conservation Police Officer. Permission will be granted if it is determined that the person requesting possession did not illegally kill or injure the deer. When retained, the head/antler and hide shall be properly tagged with an irremovable tag obtained from a Conservation Police Officer. These tags must remain attached as long as the head/antler or hide remains in the green state, or while in a commercial manufacturing process.

Feral Swine Laws in Illinois

Feral swine (wild pigs) are escaped animals from free range livestock operations, dumped pets and/or illegal releases. Feral swine negatively impact wildlife and wildlife habitat. These animals have a high reproductive potential and populations must be reduced by 70 percent each year simply to keep them from expanding.

The Department regulates the transport, release, and harvest of feral swine. Specifically:

• Hunters may only shoot feral swine during the firearm, muzzleloader, late-winter, and CWD deer seasons if the hunter possesses a valid firearm, muzzleloader, late-winter, or CWD deer permit. It is illegal to harvest feral swine outside of those dates, unless the individual has been issued a Nuisance Wildlife Permit from a District Wildlife Biologist. Pigs are considered feral swine if they are unrestrained and have adapted to living in a wild or free-roaming environment. Hunters who mistakenly or purposely shoot a domestic pig or someone’s pet may be subject to civil and/or criminal charges.

• Hunter-killed feral swine must be reported to the Department by contacting the Wildlife Disease and Invasive Animals Program Manager at 815-369-2414. Hunters may keep the legally harvested feral swine.

• It is illegal to provide outfitting or guide services for feral swine hunting in Illinois.

• It is illegal to hunt feral swine in an enclosure.

• It is illegal to release, transport, and/or possess feral swine.

Successful deer and turkey hunters who check in their harvest will be asked to report the number of feral swine they had observed during the hunting season in the county in which they were successful. These data will assist wildlife biologists in determining where feral swine are located and allow for removal of these animals before extensive agricultural and environmental damage occurs. The Department and United States Department of Agriculture have recently eliminated feral swine from the two areas known to have free ranging feral swine populations.

Report feral swine sightings to: IDNR, 8542 N. Lake Rd. Lena, IL 61048. Phone: (815) 369-2414.

Grackles, blackbirds and cowbirds may not be hunted as a game species or for recreational purposes. However, in nuisance wildlife cases, red-winged blackbirds, Brewer’s blackbirds, cowbirds, grackles and crows found causing serious injuries to agricultural crops, horticultural crops, livestock feed, or wildlife recognized by the Department or the U.S. Fish and Wildlife Service as species that are endangered, threatened, candidates for listing, or special concern, or a health hazard or structural property damage may, without a permit, harvest the above listed species provided the person:

• has authorization from the landowner or tenant

• has tried non-lethal control methods prior to lethal control

• uses a shotgun (only non-toxic shot), air gun or traps

• uses no calls, decoys, etc.

• employs legal techniques only on or over the threatened area

Rusty and yellow-headed blackbirds are protected and cannot be killed. Crows may be hunted as game by properly licensed hunters using shotguns, calls, decoys, etc. during the crow hunting season (page 36). It is illegal to recreationally hunt crows with airguns, rifles or handguns.

For reporting requirements and other federal rules, see 50 CFR 2143.

Wildlife habitat throughout Illinois is being degraded and destroyed by invasive plants such as Russian olive, multiflora rose, bush honeysuckle and garlic mustard. Native vegetation supports a much greater variety of wildlife than a habitat of exotic plants. Invasive plants reduce the number and variety of forest wildlife by reducing the availability of food and suitable cover. For instance, bush honeysuckle will shade out oak tree seedlings and, over time, reduce the oak component of a forest. Fewer acon-producing trees mean lower food availability and reduced habitat quality for white-tailed deer, squirrel, and turkey. Invasive plants in wetland areas and along lake shores, such as common reed, have a negative effect on a host of water birds. If invasive plants win, native plants and wildlife lose, and so do the people who enjoy them.

Here is what you can do to help:

1. Clean your boots and gear after each hunting trip to ensure you are not spreading invasive seeds to new locations.

2. Do not plant invasive plants for wildlife. Native species provide much better food and cover for native wildlife.

3. Learn to identify invasive plants and report any new sightings to local land managers.

Wildlife habitat throughout Illinois is being degraded and destroyed by invasive plants such as Russian olive, multiflora rose, bush honeysuckle and garlic mustard. Native vegetation supports a much greater variety of wildlife than a habitat of exotic plants. Invasive plants reduce the number and variety of forest wildlife by reducing the availability of food and suitable cover. For instance, bush honeysuckle will shade out oak tree seedlings and, over time, reduce the oak component of a forest. Fewer acon-producing trees mean lower food availability and reduced habitat quality for white-tailed deer, squirrel, and turkey. 2. Do not plant invasive plants for wildlife. Native species provide much better food and cover for native wildlife.

3. Learn to identify invasive plants and report any new sightings to local land managers.

Birds Doing Damage

Grackles, blackbirds and cowbirds may not be hunted as a game species or for recreational purposes. However, in nuisance wildlife cases, red-winged blackbirds, Brewer's blackbirds, cowbirds, grackles and crows found causing serious injuries to agricultural crops, horticultural crops, livestock feed, or wildlife recognized by the Department or the U.S. Fish and Wildlife Service as species that are endangered, threatened, candidates for listing, or special concern, or a health hazard or structural property damage may, without a permit, harvest the above listed species provided the person:

• has authorization from the landowner or tenant

• has tried non-lethal control methods prior to lethal control

• uses a shotgun (only non-toxic shot), air gun or traps

• uses no calls, decoys, etc.

• employs legal techniques only on or over the threatened area

Rusty and yellow-headed blackbirds are protected and cannot be killed. Crows may be hunted as game by properly licensed hunters using shotguns, calls, decoys, etc. during the crow hunting season (page 36). It is illegal to recreationally hunt crows with airguns, rifles or handguns.

For reporting requirements and other federal rules, see 50 CFR 2143.

Do Not Spread Exotic Invasive Plants

Wildlife habitat throughout Illinois is being degraded and destroyed by invasive plants such as Russian olive, multiflora rose, bush honeysuckle and garlic mustard. Native vegetation supports a much greater variety of wildlife than a habitat of exotic plants. Invasive plants reduce the number and variety of forest wildlife by reducing the availability of food and suitable cover. For instance, bush honeysuckle will shade out oak tree seedlings and, over time, reduce the oak component of a forest. Fewer acon-producing trees mean lower food availability and reduced habitat quality for white-tailed deer, squirrel, and turkey. Invasive plants in wetland areas and along lake shores, such as common reed, have a negative effect on a host of water birds. If invasive plants win, native plants and wildlife lose, and so do the people who enjoy them.

Here is what you can do to help:

1. Clean your boots and gear after each hunting trip to ensure you are not spreading invasive seeds to new locations.

2. Do not plant invasive plants for wildlife. Native species provide much better food and cover for native wildlife.

3. Learn to identify invasive plants and report any new sightings to local land managers.

4. Do not plant invasive plants for wildlife. Native species provide much better food and cover for native wildlife.

5. Learn to identify invasive plants and report any new sightings to local land managers.
Public Hunting Areas

Hunting regulations on the public hunting areas listed on the following pages are often more restrictive than the statewide regulations. Hunter Fact Sheets are available at: https://www.dnr.illinois.gov/hunting/FactSheets/Pages/default.aspx or from the site. Taking wildlife species not listed in this digest or on site Hunter Fact Sheet is generally unlawful, but hunting may be allowed for species not listed hereafter. Consult the Hunter Fact Sheet or contact the site directly or for information on opportunities to hunt these species. Some site-specific regulations that apply to all state sites are as follows:

General IDNR Site Regulations
It is unlawful to:
• For any person to possess any alcoholic beverage or illegal drug or be under the influence of alcohol, illegal drugs, or intoxicating compounds while in any hunting/trapping area for the purpose of hunting or trapping.
• To hunt or trap on any site with a manned check station without first declaring game killed on a previous hunt and in possession either on the hunter's person or in his vehicle.
• To construct or use any tree stand using nails, screws or any device which pierces or cuts the bark of the tree on which it is installed.
• To hunt or trap in a restricted area.
• For unauthorized persons to use or occupy in any manner designated hunting areas during the permit dove hunting season and controlled pheasant hunting season at sites holding such seasons, or during any hunting season where such restrictions are so posted at the site, when authorized hunting is in progress.
• To enter a refuge, restricted area or waterfowl rest area unless authorized by the Department.
• To hunt or trap on any Department-owned or -managed land that is not a designated area pursuant to applicable species rules (17 Ill. Adm. Code 530, 550, 570, 590, 650, 660, 670, 680, 690, 710, 715, 720, 730, and 740).

• To buy, sell or commercialize hunting or trapping rights, directly or indirectly, except that this does not apply to Department of Natural Resources hunting or trapping fees or to the operation of controlled pheasant hunting on Department lands pursuant to a written concession agreement.
• To hunt or trap without a valid permit where permits are required.
• To hunt with any weapon except shotgun or vertical bow and arrow or crossbow unless otherwise specified.
• To track deer with dogs on any Department owned or managed site during hours when deer hunting is being conducted on the site.
• To use or occupy a ground blind during any firearm deer season, unless at least 400 square inches of solid, vivid blaze orange or blaze pink material is securely attached to the uppermost portion of the blind and a substantial amount of orange or pink is visible for 360 degrees.

Public Land Hunting Windshield Cards
Free Public Site Hunting Windshield Cards are required to hunt and/or trap at many Illinois Public Hunting Areas. Cards are available at: https://dnr.illinois.gov/windshieldcard/index.asp. Print a card for each site you intend to hunt and/or trap and place on the dashboard of your vehicle when hunting or trapping the site. Each person hunting or trapping the site will need to display a windshield card. For information or assistance, contact the site where you intend to hunt and/or trap.

For most species, hunters are required to return to this website prior to Feb. 15 each year to record harvest information.

Shawnee National Forest
• See the following USDA Forest Service website for hunting and trapping regulations: https://www.fs.usda.gov/activity/shawnee/recreation/hunting
