**RE: Warehouse expansion and infrastructure project at Lakeview Commerce Center  
(Enterprise Zone) in Edwardsville IL**  
**Project Number(s): 1503483**  
**County: Madison**

Dear Applicant:

This letter is in reference to the project you recently submitted for consultation. The natural resource review provided by EcoCAT identified protected resources that may be in the vicinity of the proposed action. The Department has evaluated this information and concluded that adverse effects are unlikely. Therefore, consultation under 17 Ill. Adm. Code Part 1075 and 1090 is terminated.

Please note that a population of Royal Catchfly (*Silene regia*), a state-endangered vascular plant, has been recorded just northwest, and bordering, this project location. While listed plant species are the property of the landowner, it would be beneficial to conserve the genetic material if the plant is present at the project site. This could include translocation, seed collection, or stockpiling and replacing the surface soils containing the seed bank. You must have written permission from the landowner to disturb or relocate the plant. In addition, strict adherence to best management practices for erosion and sedimentation control should be used to minimize the possibility of any adverse impacts to the listed species and resources in the vicinity.

Consultation for Part 1075 is valid for two years unless new information becomes available that was not previously considered; the proposed action is modified; or additional species, essential habitat, or Natural Areas are identified in the vicinity. If the project has not been implemented within two years of the date of this letter, or any of the above listed conditions develop, a new consultation is necessary. Consultation for Part 1090 (Interagency Wetland Policy Act) is valid for three years.

The natural resource review reflects the information existing in the Illinois Natural Heritage Database and the Illinois Wetlands Inventory at the time of the project submittal, and should not be regarded as a final statement on the site being considered, nor should it be a substitute for detailed site surveys or field surveys required for environmental assessments. If additional protected resources are encountered during the project's implementation, you must comply with the applicable statutes and regulations. Also, note that termination does not imply IDNR's authorization or endorsement of the proposed action.

Please contact me if you have questions regarding this review.
