RE: MacCloskey Forestry Planning
Project Number(s): 1605449
County: Winnebago

Dear Applicant:

This letter is in reference to the project you recently submitted to the Comprehensive Environmental Review Process (CERP). The Department has evaluated the pertinent information and concluded that adverse effects from the project are unlikely. Therefore, the CERP review is completed.

To avoid adverse impacts to the State-threatened Ornate Box Turtle by the use of heavy machinery, please limit all work with heavy machinery to occur between November 15 - May 1. If work can't be completed during the November 15 - May 1 period, please notify Rich Lewis (IDNR).

With the condition that any driven harvest and clearing machinery be operated only on dry or frozen ground, and disturbance of any historic structures or structural ruins be avoided, this project will comply with the Illinois State Agency Historic Resources Preservation Act.

A schoolhouse is shown on the 1859 plat of the property; however, subsequent plats show a school clearly off-property, west of the road. A school building may or may not ever have actually been on this property.

This review is valid for two years unless new information becomes available that was not previously considered; the proposed action is modified; or additional species, essential habitat, Natural Areas, wetlands, or protected cultural resources are identified in the vicinity. If the project has not been implemented within two years of the date of this letter, or any of the above listed conditions develop, a new consultation is necessary.

Please contact me if you have questions regarding this review.
